AKZO NOBEL COATINGS INC.

Akzo Nobel Coatings Inc. provides high quality coatings for the garage door market. Akzo Nobel produces polyester, siliconized polyester, Kynar PVDF, epoxy, and Platisol coatings for a variety of markets including garage and entry door, HVAC, automotive, and appliance goods. The North American market is served through four strategic locations: Columbus, OH; Birmingham, AL, St. Jerome, Quebec; and Garcia, Mexico. As the largest paint company in the world, Akzo Nobel has access to worldwide technology for a multitude of applications.

ARROW TRU-LINE, INC.

Established in 1970, Arrow Tru-Line offers a complete line of high quality components for residential, commercial and industrial door applications. Arrow Tru-Line is based in Archbold, OH with multiple distribution points across the USA and Canada. In total, ATL operates from over 600,000sq ft of manufacturing space specializing in roll-formed and stamped metal products, with light assembly capabilities. With an ATL office staffed in the pacific-rim, importing capabilities compliment the complete line.

Including track, struts, angle, stiles, hinges, cable drums, spring fittings, cable assemblies, rollers, bearings, brackets, lock components, tube and shaft, decorative hardware, rolling door components, springs, chain hoists, fasteners and more. Basic and proprietary parts, part design and sampling, plus tooling cost optimization. Distribution points across USA and Canada.

ATL's experienced Engineering Department oversees our quality, tech support, and new product development with our customers.

ATLAS EPS

Atlas EPS specializes in the manufacture of quality HCFC-Free Polystyrene insulation products. Atlas EPS Insulation is suitable for interior and exterior applications. This improved thermal envelope increases the total R-value of the structure and improves occupant comfort. Durable yet lightweight, Atlas Insulation is easily cut and installed with minimum waste.

With four plants in the U.S., Atlas EPS can provide foam garage door core insulations from coast to coast. Capabilities include: embossing, lamination, slitting, routing and special packaging.

With a dedicated Engineering Department and Quality Assurance Department Atlas can offer solutions to the most difficult design applications.

Atlas EPS has been in business for over 35 years. As one of the pioneers in EPS (Expanded Polystyrene) foam technology, Atlas remains the leader in supplying insulation solutions to the garage door industry.

ROLL COATER, INC.

Roll Coater is a continuous coil coater with five manufacturing locations. These locations are Greenfield, IN, Kingsbury, IN, Weirton, WV, Hawesville, KY and our newest facility in Armorel, AR. Roll Coater offers multiple coat paint systems, printing, vinyl laminates, dry-film lubricants, and strippable coatings on our six coating lines. Roll Coater also provides in-line tension leveling at all manufacturing facilities, and on all coating lines, for those critical applications requiring extremely flat shape. Both in-line and off-line embossing are offered at the Greenfield and Hawesville locations. Roll Coater also added post-tension leveling on production units that offer in-line embossing services. All coating units have in-line tension leveling available prior to the coating process. Roll Coater can process product from 24"-72" wide. Each Roll Coater facility has slitting capabilities on the plant floor, eliminating the need to transfer product to a different location. The Roll Coater staff includes field technical service representatives to aide in metal and fabrication challenges. Shipping and receiving by railcar can be done at Kingsbury, Hawesville, and Armorel. All locations can accommodate 50,000 lb. coils. All locations are ISO certified and are trained in Six Sigma methodology.

ROYAL MOULDINGS LIMITED

Royal Mouldings, the largest marketer and manufacturer of decorative polymer mouldings and cellular vinyl extrusion components in North America, announces the industry's best selection of door components and garage system components for energy efficiency, low maintenance and upgrading the area to more family space for the homeowner.

- **Garage Solutions™: Thermo Garage Trim Systems** – A low maintenance, moisture resistant, termite proof Cellular PVC product group which totally eliminates the problems of wood and metal systems. The program consists of: Thermo Stop®, Door jamb, brick mould and casing-backband. Each piece is carefully designed to work closely together to insure ideal appearance with energy efficiency and low maintenance.
- **Garage Solutions™: Overlays™** - Overlays consists of a unique group of products designed to upgrade the exterior of all garage doors to a carriage door appearance with a no rot, low maintenance prefinished and ready-to-stain cellular PVC trim system consisting of 1x2, 1x4, 1x6, 1x8, 1x10 and 1x12 sizes. The Overlays garage components are moisture proof, mold resistant, and add value to the home.
- **Garage Solutions: Everdry™** - Everdry wall system includes a specially designed baseboard and wall board that when cleaning keeps the water and residue from seeping behind the moulding and wall. It does not promote mold. The beaded wall board and cap adds beauty and offers protection from moisture.
- **Pro Frame®** entrance and patio door system is the industry's only totally no-rot, low maintenance door system with an all cellular vinyl and composite entry frame. Proframe includes one of the industry's best and largest assortments of exterior and interior trim profiles available and has received NOA number 02-0408.05 Miami-Dade County Florida expiration date April 3, 2008 for these components. Proframe's unique system is waterproof from the top to the bottom of the frame, with no wood construction used. The system is available painted and ready to stain for steel and fiberglass doors. The original factory applied finish is covered by a 10-year limited warranty for UV degeneration. Proframe is available in lineal or prepackaged kits and also provides the industry's largest selection of sizes, including 4 9-16", 5 ¼", 6 9-16", and 6 13-16". The cellular vinyl is combined with a composite post-treated filler core that further strengthens the product.

STEEL DYNAMICS, INC.

Steel Dynamics is a world-class steel mini mill, headquartered in Fort Wayne, Indiana. Our flat-rolled division produces 2.5 million tons per year of high quality Hot Rolled, Cold Rolled, Hot Dipped Galvanized and Galvannealed steel. Our innovative post-annealed galvanized steel is being used throughout the industry as a low-cost alternative to expensive DDS and IF steels typically necessary to satisfy the demanding forming requirements that characterize raised panel garage doors. The recent start-up of our ultra light gauge galvanizing line in Jeffersonville, Indiana, further expands our product offering to include material as light as .008" in thickness. We have also recently completed construction of a new continuous coil coating line adjacent to our flat-rolled mill, allowing us to provide low-cost, high-quality prepainted steel to the garage door industry. The coil coating line incorporates tension leveling and in-line continuous color measurement to ensure we can satisfy the quality requirements of even the most demanding garage door applications.

Company Name: Steel Dynamics, Inc.

(Principal Office)

Address: 4500 County Road 59

THE SYRACUSE STAMPING COMPANY

Syracuse Stamping has been manufacturing high quality garage door hardware for over 75 years. Our full line of Syraco products includes bearings, rollers, pulley, hinges, brackets, handles, and ring barrels. In addition, we have the manufacturing and engineering capability to product special orders to meet your unique needs.

ROLLER AND HINGES: We manufacture a full line of both rollers and hinges for all types of garage door applications. We have both seven and ten ball rollers, with staked or bulged shafts. We also manufacture two types of nylon rollers, 2-inch and 2-inch ten-ball, both with bulged shafts. Custom shaft lengths for your rollers are also available. We offer hinges both US Style and OS Style. Gauges for our hinges are available in 11, 13, 14, 16, and 18.

PULLEYS: Syracuse Stamping fabricates three, four, and five-inch zinc coated steel pulleys. We have forks, studs, nuts, and bolts to complement the pulleys.

OTHER GARAGE DOOR HARDWARE: As your full service supplier, we make a full range of other hardware parts including, but not limited to, brackets, clips, bearings, handles, washers, ring barrels, and we look forward to providing new or custom Syraco products to address your specific requirements.
