

## DBCI Launches Sheet Door With Replaceable Panels

In February, DBCI announced Curl-Lok, the first rolling sheet door that can be quickly repaired on site without any specialty tools. The new door is made of removable panels with engineered curls along the edges that lock into place instead of seam together.

“This is a huge advancement for our customers,” says Larry Miller, vice president of operations. “In the past, the only options for a damaged door were to either live with it or replace the entire thing. Now they can change out a damaged panel at significantly less cost.”

DBCI says that Curl-Lok introduces the completely new market of sheet door repair. The company expects that many customers will keep replacement panels on-site, reducing downtime.

To develop the Curl-Lok manufacturing process, DBCI partnered with The Bradbury Group. Customers can find a demonstration video and product information at [www.curl-lock.com](http://www.curl-lock.com). [www.dbci.com](http://www.dbci.com) ■

## Cornell and Cookson Introduce Rolling Door First

In January, the Cookson Company and Cornell Iron Works, both brands of CIW Enterprises, announced the first rolling door that meets the 2012 International Energy Conservation Code (IECC) air infiltration requirements.

After independent testing, Cornell’s Thermiser Max and Cookson’s Temp-Master insulated doors incorporate an exclusive combination of sealing, insulation, and thermal breaks to surpass the IECC’s air infiltration requirements of less than 1.0 CFM/FT<sup>2</sup>.

The two companies say coiling doors were previously exempted from this requirement. Now, with adoption of the new energy code, coiling doors can no longer take exception and must demonstrate building code compliance.

The components of the system may be retrofitted onto previously installed coiling doors to decrease air infiltration by up to 85 percent and improve energy efficiency. Also, the sealing and sound attenuation capabilities of Thermiser Max and Temp-Master doors may be used to improve employee comfort and quality control. ## LiftMaster Unveils Smartphone Control for Any GDO

In January, LiftMaster announced MyQ Garage (821LM), a smartphone garage door controller that syncs any compatible opener manufactured after 1993 with a homeowner’s smartphone, tablet, or computer. This gives the user the ability to open or close the garage door from anywhere and receive real-time alerts if and when the status of that door changes.

In addition, the 821LM and the MyQ Control Panel (888LM), which enables smartphone control of LiftMaster Security+ openers manufactured since 1998, have received UL listings. They are the only smartphone garage door controllers to have the UL designation.

## Amarr Launches Amarr Entrematic Brand

In March, the new Amarr Entrematic logo began being integrated into Amarr’s branding and marketing initiatives.

Vickie Lents, Amarr marketing director, says the Entrematic endorsement will bring greater recognition to the Amarr brand as an entrance automation solution.

Entrematic is the Entrance Systems division of Assa Abloy, which acquired Amarr in November 2013. Other brands in the Entrematic portfolio are Kelley, Serco, Ditec, and Dynaco. [www.amarr.com](http://www.amarr.com) ■

## Raynor Introduces High Performance Doors

In February, Raynor announced the RapidCoil line of high performance doors for interior and exterior applications requiring high speed and superior performance.

RapidCoil doors' sealing technology makes them more efficient than conventional gravity doors. Thus, heat loss is minimized, which can decrease operating costs in manufacturing environments. The RapidCoil line also features a soft bottom bar for safety.

The RapidCoil line has four models: RC100, RC200, RC300, and RC300HD. [www.raynor.com](http://www.raynor.com) ■

## Skylink Launches Backup Battery with Built-in LED

In February, Skylink Technologies announced the launch of its new backup battery, which is compatible with all Skylink garage door openers. This is the first backup battery on the market that, in a power outage, not only opens your garage door but also provides lighting in the garage with a built-in LED.

## Schweiss Announces Container Doors

In November, Schweiss introduced hydraulic one-piece doors for the sides of containers, simplifying access to items in the center or back. The doors are pre-hung on their own frames with a compact pump and strong cylinders and spherical bearings.

Schweiss has a display trailer (see photo) and can also build customized containers. [www.schweissdoors.com](http://www.schweissdoors.com) ■

## North Central Adds 3" Sections

In February, North Central Door introduced 3"-thick versions of its polystyrene sandwich doors in both residential and commercial sizes.

The new door is available in 10 colors and four panel designs: flush, raised panel, raised long panel, and recessed carriage panel. Door widths up to 24' can incorporate 48" x 16" or 44" x 16" windows, providing a full-view appearance while maintaining an insulated framework and thermal break. ## Amarr Adds Black Doors

In January, Amarr announced that it now offers the color black for its residential polyurethane Olympus and Designer's Choice Collections.

Vickie Lents, marketing director, says the new color responds to customer requests. "Black is a popular garage door color option in some regions of America and particularly in Canada," she adds. [www.amarr.com](http://www.amarr.com) ■

## Amarr Adds Colors and Window Designs to Commercial Door

In January, Amarr announced several modifications to the Commercial Model 1380 to help dealers better compete in the growing neighborhood commercial, pole barn, and designer outbuilding markets.

The Model 1380 sections now feature a woodgrain-embossed flush exterior with residential stile and window placement for a more residential look. The 1380 is also now available in three new colors: Almond, Wicker Tan, and Sandtone. [www.amarr.com](http://www.amarr.com) ■

## Life is Easy with

Buy the best commercial and residential controls directly from the manufacturer. Vee builds durable, high-quality, reliable controls for the Garage Door and Gate Industry.

## Clopay Introduces Steel Garage Doors in Black

In February, Clopay announced that it had added black to its steel garage door color wheel. The company is using new thermal reflective paint technology to reduce surface temperatures and heat absorption.

Clopay's factory-applied black paint finish became available in March on the Gallery Collection and Classic Collection doors with Intellicore insulation technology.

## Linear Launches Enterprise Access Control

In April at the ISC West show in Las Vegas, Linear plans to launch Linear Enterprise, a browser-based, embedded network appliance and access control system available through select Linear dealers equipped for large-scale installations. Enterprise offers remote management, low total cost of ownership, an easy path to VMS integration, and a unique license key system that simplifies integration and expansion.

"We incorporated everything a future-proofed access control system would need and made it easy to install and affordable to maintain," says Duane Paulson, senior vice president of product and market development. "We are offering exclusivity to top dealers who have experience handling the complexities of large installations." [www.linearcorp.com](http://www.linearcorp.com) ■

## MMTC Adds Siren-Activated Gate Sensor

In January, MMTC announced the addition of a new Siren-Activated Gate Sensor.

The sensor allows entry of emergency vehicles by using the frequency of the emergency siren while all other sounds are rejected. This saves time and potential damage when first responders are forced to stop, enter code, or smash through gates.

Designed with all new state-of-the-art materials, the Siren-Activated Gate Sensor is unaffected by dust, moisture, or adverse weather conditions. [www.mmtcinc.com](http://www.mmtcinc.com) ■

more  
flexibility

More flexibility means a lean organization with the ability to quickly adapt to instantly changing business environments and production design requirements, as well as providing more rapid response times to customer needs and inquiries. It provides a culture where change is accepted and embraced, allowing us to provide an individualized service offer that meets your unique criteria. It means assistance in designing an engineered coating system or in converting end users from post-paint to pre-paint to save capital, reduce work-in-progress inventory, free up warehouse space to make additional product and minimize material handling, environmental concerns, and insurance costs. Experience the Metal Coaters difference at [www.metalcoaters.com/the\\_difference](http://www.metalcoaters.com/the_difference).

## Clopay Model 3730 Now Offered Up to 30'2" Wide

Clopay's commercial Model 3730 3" polyurethane-insulated steel door is now available in widths up to 30'2".

The Model 3730 three-layer steel "sandwich" door features environmentally safe, CFC- and HCFC-free polyurethane insulation foam injected between a 27-gauge exterior skin and a 28-gauge interior skin with a thermal break, providing an R-value of 22.2. ## EMX Technology Granted Trademark Status

In February, EMX Industries announced it had received trademark status for its Detect on Stop loop detector feature. By triggering an output once a vehicle is completely stopped, Detect on Stop ensures gates and doors open only when intended. The feature is included in the ULT series of vehicle loop detectors.
