High Performance Door Warning Labels

The members of DASMA’s High Performance Door Division agreed there was a need to create uniform warning labels that may be affixed to high performance door products. The labels provide users of these products with helpful safety information. The labels were created using the guidelines of the ANSI-Z535 series of standards regarding the content and format of product safety labeling. It is important to recognize that, in accordance with the ANSI-Z535 standards, the word “warning” on an orange background indicates that serious injury or death could occur from the hazard stated on the label.

ANSI-Z535.4 provides guidelines for maintenance or replacement of safety labels. These guidelines are as follows:

**Maintenance:** Product safety labels should be periodically inspected and cleaned by the product user as necessary to maintain good legibility for safe viewing distance.

**Replacement:** The product user should replace product safety labels no longer meeting the legibility requirements for safe viewing distance. The product user should contact the product manufacturer to determine a means for obtaining replacement labels for their particular door.

The labels created by DASMA warn of hazards associated with a high performance door. A list of instructions are also given pertaining to safe operation. A label should be placed at a readable height on the door.

See Figures 1-7 for label options. The choice of which label to use on a door will depend on the door movement (horizontal versus vertical), whether the door also has pinch points, and whether door movement and pinch point warnings should be on the same label or on separate labels which is at the discretion of the door manufacturer or installer.

---

Note: Technical Data Sheets are information tools only and should not be used as substitutes for instructions from individual manufacturers. Always consult with individual manufacturers for specific recommendations for their products and check the applicable local regulations.

This Technical Data Sheet was prepared by the members of DASMA’s High Performance Door Division. DASMA is a trade association comprising manufacturers of high performance doors, fire doors, grilles, counter shutters, sheet doors, and related products; upward-acting residential and commercial garage doors; operating devices for garage doors and gates, sensing devices, and electronic remote controls for garage doors and gate operators; as well as companies that manufacture or supply either raw materials or significant components used in the manufacture and installation of the Active Members’ products.

# WARNING

**STAND CLEAR!**
- Moving door can result in injury or death.
- Do not close door until doorway is clear.
- Door can close automatically.

**STAND CLEAR!**
- Moving door can result in injury or death.
- Do not close door until doorway is clear.
- Door can close automatically.

**PITCH POINT!**
- Keep hands clear of moving door.
- Could cause serious injury or death.

**STAND CLEAR!**
- Moving door can result in serious injury or death.
- Do not close door until doorway is clear.
- Door can close automatically.

**STAND CLEAR!**
- Moving door can result in serious injury or death.
- Do not close door until doorway is clear.
- Door can close automatically.

**STAND CLEAR!**
- Moving door can result in serious injury or death.
- Do not close door until doorway is clear.
- Door can close automatically.

**PITCH POINT!**
- Keep hands clear of moving door.
- Could cause serious injury or death.

**WARNING**

**STAND CLEAR!**
- Moving door can result in injury or death.
- Do not close door until doorway is clear.
- Door can close automatically.

**WARNING**

**STAND CLEAR!**
- Moving door can result in injury or death.
- Do not close door until doorway is clear.
- Door can close automatically.

**SAFETY INSTRUCTIONS**

For your safety and the safety of others, follow these instructions:
1. Adjustments or repairs must *ONLY* be made by a trained door systems technician using proper tools and instructions.
2. Do not stand in doorway, and DO not walk into moving door path. Keep doorway clear and in full view while operating door.
3. Do not allow children to play on, near, or with the door or to operate the door or door controls.
4. Visually inspect door and hardware regularly for worn, broken, and inoperative parts.
5. Electric door sensing features should be tested regularly following manufacturer’s instructions.
6. For more information, please read the Owner’s Manual for the door and operator.

**WARNING**

- **STAND CLEAR!**
  - Moving door can result in serious injury or death.
  - Do not close door until doorway is clear.
  - Door can close automatically.

- **PINCH POINT!**
  - Keep hands clear of moving door.
  - Could cause serious injury or death.

**SAFETY INSTRUCTIONS**

For your safety, and the safety of others, follow these instructions:

1. Adjustments or repairs must ONLY be made by a trained door systems technician using proper tools and instructions.
2. **DO NOT** stand in doorway and **DO NOT** walk into moving door path. Keep doorway clear and in full view while operating door.
3. **KEEP HANDS AWAY** from door curtain guides and header/roll during operation.
4. **DO NOT** allow children to play on, near, or with the door, or to operate the door or door controls.
5. Visually inspect door and hardware regularly for worn, broken, and inoperative parts.
6. Electric door swaying features should be tested regularly, following manufacturer’s instructions.
7. For more information, please read the Owner’s Manual for the door and operator.

Place label at a readble height on door drive side guide or jam.

**DO NOT** remove, cover or paint over this label.

This label should be inspected periodically for legibility, and a replacement label should be ordered from the door manufacturer as needed.

DOOR SAFETY LABEL INFORMATION

Construction: Polypropylene Over-laminate
Semi-Gloss Paper Face Stock
Permanent Adhesive
40# liner

Facestock: A tear and moisture resistant facestock consisting of a 2 mil polyester film structure that is protected by a tough clear 3 mil polyester over laminate for added abrasion resistance for added abrasion resistance and UV exposure for high strength and good resistance to environmental factors.

Adhesive: Permanent 2.0 mil adhesive that performs extremely well on plastic and metal surfaces. Is excellent for exposure to UV, humidity, and high temperatures.

Minimum Application Temperature +50°F
Service Temperature Range -40°F to +350°F

Liner: A 55# densified kraft liner featuring high internal strength, toughness, and tear resistance. Has excellent die cutting and stripping properties for use in sheeted and roll-to-roll applications.

Freeze/Thaw Cycles: No evidence of any adhesive lifting or de-lamination throughout -20°F to +250°F. Freeze/Thaw cycles (4 hrs. freeze/4 hrs. room temp./4 hrs. hi-temp.
