

## ArmRLite unveils two new overhead doors

Earlier this year, ArmRLite launched the TimbRLite, a residential overhead door designed with sustainable engineered wood that gives the appearance of real wood and requires less maintenance.

In October, the company introduced the Alexander residential overhead door, which features a cross-bucking, rustic design. Both the TimbRLite and Alexander models are available in more than 25 finishes, with dozens of custom design choices, including glass and wind-load or insulated frame options. ## Clopay introduces Bridgeport Steel line

In October, Clopay introduced the Bridgeport Steel line of recessed panel garage doors. Bridgeport doors feature simple lines and insulated three-layer steel construction, and come in 10 standard paint colors and four Ultra-Grain wood-look finishes. Narrow or extended-width panel designs are available with optional windows and decorative hardware.

Bridgeport doors offer Intellicore insulation technology in 2" or 1-3/8" panels and comply with HFC-free mandates enacted by states including California, Washington, and New Jersey, and also in Canada. [www.clopaydoor.com](http://www.clopaydoor.com) ■

## Northwest Door launches Builder Classic

In October, Northwest Door launched its new full-view aluminum door, the Builder Classic. Similar to the Modern Classic, the Builder is constructed using commercial-grade extruded-aluminum stiles and rails, with framing members that are mechanically fastened at the joints, and a tongue and groove joint with a compressible gasket incorporated at the meeting rails.

The stiles and rails of the Builder Classic allow for larger viewing areas. The new door is available in multiple finish and glass options, and the full-vision design makes it suitable for housing complexes, restaurants, and office spaces. [www.nwdusa.com](http://www.nwdusa.com) ■

## CornellCookson adds Electronic AutoLock for grilles

In October, CornellCookson introduced the Electronic AutoLock for its Extreme MicroCoil Grille – 500K Cycle. The proprietary lock mounts to each of the guides and automatically engages, securing the closed grille and adding security by increasing lift resistance.

AutoLock can withstand up to 1,200 pounds of force on grilles with aluminum guides and up to 940 pounds of force on stainless steel guides without the bottom bar lifting over the lock. It can be retrofitted to an existing MicroCoil grille or added as an option on a new grille. [www.cornellcookson.com](http://www.cornellcookson.com) ■

## Garaga expands full-vision door collection

In September, Garaga expanded its California Collection full-vision doors to include seven frame colors and 10 impact-resistant types of glass.

Darker window color options, including Satin Black, Graylite, and SuperGrey, are now available for the California doors. Architects and consumers who prefer lighter glass can now add texture and intimacy by choosing Screen or Pinhead windows.

Updated pictures of the various glass types are showcased on Garaga's Design Centre. [www.garaga.com](http://www.garaga.com) ■

## LiftMaster launches CAPXLV access control system

In October, LiftMaster introduced the Connected Access Portal with Video (CAPXLV). The new access control system includes all the same features of the CAPXL with an added integrated 135-degree wide-angle camera that provides video and

monitoring capabilities for residential communities.

The CAPXLV offers customizable applications that help streamline the management of building, resident, and community access points and provide clear visuals for safety. Community managers can enhance their monitoring capabilities with myQ Community Control and the Community by myQ app for residents.

The CAPXLV is also compatible with LiftMaster's full line of gate operators and access control products. Existing CAPXL units can be upgraded with the Video Camera Kit for CAPXL. [www.liftmaster.com](http://www.liftmaster.com) ■

## Northwest Door offers Hörmann commercial door

In October, Northwest Door added the Hörmann Steel Ranger 9500 RS rolling steel commercial door to its product lineup. This springless, direct-drive, insulated door can fit openings up to 24' x 16'. The 9500 is manufactured at Hörmann High Performance Doors in Pittsburgh and ships out of their facility in Burgettstown, Pa.

The launch of the Steel Ranger marks an important move by Northwest Door and

Hörmann toward creating a uniform presence and product offering across the United States. [www.nwdusa.com](http://www.nwdusa.com) ■

## Raynor introduces ThermaXPS Insulation for AV200

In July, Raynor announced that its AlumaView product line is now offered with an insulated option. The AV200 rails and stiles are filled with Raynor's ThermaXPS closed-cell insulation. The enhanced AV200 combines a modern aluminum door design with additional thermal efficiency.

[www.raynor.com](http://www.raynor.com) ■

## New ArmRLite model FBC-approved

In July, ArmRLite announced that its Custom C.I. wind-loaded aluminum and glass overhead sectional door is now Florida Building Code (FBC) approved. The FBC-approved model can reach up to 27' wide and can meet the \*140 mph requirement.

The Custom C.I. options include glass glazing and multiple finishes. The approval applies to the majority of counties in the state of Florida but does not apply to the

high-velocity hurricane zones. This product has not been impact tested. [www.armrlite.com](http://www.armrlite.com) ■

*\*In the fall issue, we incorrectly published that the Custom C.I. door "can meet the 40 mph requirement." The correct text is, "can meet the 140 mph requirement."*

## Wayne Dalton adds new woodgrain options

In July, Wayne Dalton introduced Red Walnut and Weathered Gray finishes for its Model 9510 Designer Steel Collection.

The pinch-resistant Model 9510 features the TorqueMaster Plus counterbalance system and doors with foamed-in-place polyurethane insulation. It is offered in both Vicksburg and Ridgefield panel designs and a variety of color options including the two new woodgrain finishes. [www.wayne-dalton.com](http://www.wayne-dalton.com) ■

# Timeless Beauty.

Give your customers the custom carriage house feel without the maintenance of real wood. The emerging designs in the American Tradition™ Series work with every architectural style, enhancing any home's curb appeal. Homeowners can create the door they desire with multiple options in color, wood grains, overlay configurations, and window glass options to suit any look with proven performance.

Haas Door makes it easy to run your business with unique tools that help you sell, order, install, and maintain our products. Be sure to visit [HaasCreate.com](http://HaasCreate.com) to help your customers visualize one of our doors right on their home. Then configure and quote it with HaasWorx, an online ordering system where you can also access track, spring, face, and wind load drawings. Instruction manuals and other technical information are all easy to find at [connect.haasdoor.com](http://connect.haasdoor.com). And once the door is installed, scan the QR code on any section label for specific product specs of any door you need to service. Haas Door truly helps you open the door to endless possibilities.

- 5 Year Overlay Delamination Warranty
- 3 Year Spring Warranty

open the door to  
endless possibilities

## CornellCookson highlights EverGard Tube Motor Operator

In October, CornellCookson revealed its EverGard Tube Motor Operator. The EverGard is engineered for openings with tight clearances for the coil area. It also features

an integrated, auto-recharge battery that allows the door to operate for up to 10 cycles in a 48-hour period without power.

The EverGard conceals drive components, offers a totally enclosed, non-ventilated motor, and includes a speed governor. Programmable self-testing battery and indicator light are also included. [www.cornellcookson.com](http://www.cornellcookson.com) ■

## Raynor releases new Woodtone options

In July, Raynor introduced three single-direction woodtone options for its BuildMark product line. Auburn, Mocha, and Walnut are now available on all BuildMark panel styles.

[www.raynor.com](http://www.raynor.com) ■

## CornellCookson adds Sloping Bottom Bar option

In October, CornellCookson announced the new Sloping Bottom Bar for its Extreme MircoCoil Grille – 500K Cycle product.

The new bottom bar offers a 1" slope per 1' DBG, which is double the sloping capability of a standard sloped bottom bar. The low-profile tubular design is made possible due to a continuous uniform grille that gradually increases in length, allowing the absence of a pitch plate. [www.cornellcookson.com](http://www.cornellcookson.com) ■

## EMX offers new digital timer

In October, EMX launched the new PTM 7-day timer, which is designed to control the open and close times for overhead doors, gates, and parking barriers. This timer is easy to set up, reduces wear and tear on motor controls, and extends the life of your equipment.

Features include 16 on/off events per day, 15 combinations of daily programs, three power supply options (12, 24, or 120 VDC/AC), DIN rail-mount installation, internal battery backup for power outages, and a 12- or 24-hour clock.

### CornellCookson touts riot protection option with StoreDefender

In October, CornellCookson released the StoreDefender, an 18-gauge door featuring a 6" heavy duty bottom bar that is resistant to lifting and prying. Additional features include screw-in slats and continuous wind locks.

StoreDefender is engineered specifically for pharmacies, cannabis dispensaries, high-end retail stores, and big box chain stores, and is offered in a variety of colors. It can provide automatic protection when paired with AlarmGard, which allows the door to be activated by a building alarm or panic button.

[www.cornellcookson.com](http://www.cornellcookson.com) ■

### Raynor announces new glass option for TM300 and TM320

In May, Raynor announced that a 1"-insulated glass option is now available for its TM300 and TM320 ThermaSeal doors. The new size is designed for energy efficiency and to meet new building design requirements, such as California Title 24. [www.raynor.com](http://www.raynor.com) ■

### Midland Door Solutions offers four-fold doors

In October, Midland Door Solutions highlighted that it manufactures and installs four-fold vertical doors, which are designed to offer increased retract speed and improved safety.

Four-fold doors open vertically rather than horizontally and are ideal for buildings housing emergency response vehicles, such as fire stations.

Additional features include an all-steel frame, UL control panel, a 7- to 10-second open rate, minimal headroom, and various finish and window options. A safety edge and photo-eyes also come standard.
