The *D+AS Show Guide* is a special DASMA publication that highlights key exhibits and products featured at the IDAExpo and Fencetech shows. With the cancellation of the 2021 events, this year's "No Show" *Show Guide* includes information about the companies and hot products that you would have seen at the show.

Our Pages feature industry companies that invested in this extra effort to inform you of key announcements, services, and products that would have been showcased at their exhibits.

Our Readers are 20,000 professionals in the door, gate, and access control systems industry throughout North America.

Our Advertisers are DASMA members that had planned to exhibit at the 2021 IDAExpo and/or Fencetech. To learn about advertising in the next *Show Guide*, visit www.dasma.com and go to the Publications/D+AS Show Guide page.

BEA releases new mobile app

BEA Sensors launched a mobile app for its LZR-WIDESCAN sensor used for motion, safety, and presence detection for industrial door applications. The new app allows users to easily view and configure sensor settings, including field configurations, immunity, brackets for mounting options, and more.

The laser-based sensor creates a volumetric detection area by generating seven curtains designed to detect objects based on direction, speed, size, and height, while operating independent of ground conditions.

A message from BEA Sensors

BEA's portfolio includes a variety of technology and robust solutions to meet their customers' automation needs. The company is also dedicated to providing superior service and a variety of webinar, application troubleshooting, and training opportunities. www.beasensors.com

NO EXHIBITION, NO PROBLEM!

BEA is hosting a virtual event with industry-leading manufacturers and standards experts.

Join us **May 11 – 13** as we dig into industry trends and compliance, as well as key products solving unique application challenges.

Arrow Tru-Line continues to adapt as business booms

With the growing trend in increased home renovations, Arrow Tru-Line has been busy. In 2020, the company focused on making key changes to minimize lead times. They added three shifts to each of its manufacturing facilities to help accommodate the increased demand in sales.

They are also considering automation and currently looking to fill several positions. “As people continue to upgrade their homes and garage doors, Arrow Tru-Line will continue to be an ‘ever-changing’ company. We are moving forward ... adapting operations, adding new positions, improving manufacturing processes, and expanding our service options to meet the needs of our customers,” said John McLaughlin, chief commercial officer/partner.

The company anticipates a robust 2021 thanks to the recently lifted travel and stay-at-home restrictions and the reopening of more states.

A message from Arrow Tru-Line

During its 50 years of business, Arrow Tru-Line has grown from a single small facility to a global manufacturing company with multiple facilities, including its Archbold, Ohio, corporate headquarters; a manufacturing facility in Bryan, Ohio; and multiple distribution centers throughout the United States and Canada. www.arrowtruline.com

Marantec highlights new DC operator

Marantec America launched the VTA Series commercial garage door drive operators featuring DC technology. The new German-engineered and manufactured VTA opener is safe, functional, reliable, and easy-to-use.

The DC technology allows the VTA to automatically switch to either 110V or 220V without requiring any extra modifications. The internal worm gear is made of bronze, which provides extra torque during operation, and the VTA's high-quality components help maximize the door's lifespan.

UL 325-listed and rated for 20 cycles per hour (or 450 per day), the new VTA operator is perfect for spring-balanced sectional doors up to 194 sq.-ft. in size. Additional features include a static torque of 897 lbs., a slow-start/slow-stop feature, built-in instant reverse, and an optional battery back-up system.

► **DC TECHNOLOGY:**
Compatible with
either 110V or 220V.

A message from Marantec America

Marantec has been a trusted manufacturer of commercial door operators for nearly 60 years and is an industry leader in commercial operators with DC technology. Marantec's top priorities are its customers and the safety of its products which are designed with world-class German engineering and the highest quality components. www.marantecamerica.com

PRE-MADE BRUSH SEAL INSTALLATION KITS

Save valuable time with pre-made Brush Seal Kits from Action Industries. A great solution for installers working on residential, commercial, and rolling steel doors. Brush Seal Kits cut down on inventory and free up space on your shelf or in your truck. Each kit comes with Flex Brush installed and is available in professional or retail lengths.

Kitting

Custom packaging for weather seal kits, perimeter seals, door sweeps, dock levelers, and more! Custom options available for Action Industries products.

Cutting

Need to cut down on freight? Action Industries offers custom-cut lengths on aluminum products to provide the most economical shipping options possible.

Punching

Our in-house press can pre-punch aluminum or plastic products to help make installation more prosperous for any job.

Just-In-Time Stock

Action Industries offers a "Just-In-Time" stocking solution where we hold the product for you. With four distribution centers, you'll receive the product within 24 hours.

Brush Seal Kit Details

- Available in Standard (#4) and Slim-Line (#2.5) Channel Sizes. Customers can choose from two stocked sizes: Professional (full length) or Retail (four foot) packages.
- Choose from a straight or 45-degree retainer for easy installation on any residential or commercial application.
- Brush Seal kits can quickly install on 8' X 8', 8' X 10', 10' X 10', 12' X 12', and 12' X 14' residential, commercial, and rolling steel doors.
- Choose custom brush bristle lengths based on your job.
- Standard Flex Brush sizes 1", 1-1/2", 2", and 3"
- Slim-Line Flex Brush sizes 1/2", 3/4", 1", 1-1/2", and 2"
- Comes with Action Industries Flex Brush pre-installed and holes pre-punched for easy installation.

About Action Industries

Action Industries is a one-stop-shop supplier of garage door parts and manufacturer of weather seals. With the slogan "Every Part For Every Door", Action Industries goes above and beyond to provide customers with the best products in the industry. Action Industries offers a variety of value-added services including kitting, punching, custom branding, Just-In-Time stocking solutions, and no minimum order quantities. With four distribution centers and a national footprint, Action Industries can help customers reduce lead times and minimize landed costs. Being a manufacturer of weather seals allows Action Industries to develop custom solutions for customers using the latest processes in the industry. Action Industries provides customers with options for custom extrusion, thermoforming, injection molding, and rapid prototypes.

Action Industries expands inventory with new Brush Seal Kits

Action Industries launched a line of Brush Seal Kits, an all-in-one weather seal solution for residential and commercial garage doors. The kits include everything needed to install brush seals and are available in customizable sizes and various brush lengths.

Brush Seal Kits simplify the ordering and installation of weather seals. Each kit comes with aluminum retainers with pre-punched holes, a brush seal pre-installed in the aluminum retainers, and self-tapping screws.

The seals are also precut to fit the most popular garage door sizes. No drilling is required, and only minimal cutting of the material is needed; simply open the kit and install the retainers on the jambs and header of the door frame.

A message from Action Industries

Action Industries is a one-stop shop for door and access systems dealers offering an extensive inventory of weather seals, hardware, lubricants, springs, dock products, and access control systems at four distribution centers across the United States.

Action Industries' sister company, Torsion Plastics, is also a leading supplier of custom designed weather seals, thermal breaks, glazing beads, window frames, decorative trim boards, and window inserts to garage door manufacturers throughout North America. www.action-ind.com

Haas Door unveils new insulation and color options

Haas Door added an insulated rail option to its Commercial Aluminum 320 and Residential Aluminum 360 all-glass garage doors. The rails are insulated with polystyrene, and the rail ends are capped to provide a professional, clean look.

The tongue and groove joint with bulb seal meets the requirements for air infiltration tested to ASTM E283-04. The insulated rail option, with Solarban 70 glass and Argon gas, features the highest thermal performance rating available. The new options provide more protection against heat or cold and restrict air from flowing into the building from the outside.

Haas Door also announced new customized color options for its American Tradition Series doors. The on-trend update allows homeowners to mix any overlay board color, including woodgrain, with a different woodgrain or color option on the base. Dealers can promote this custom feature to enhance curb appeal and improve home value.

◀ **NEW RAIL OPTION:**
Insulated with polystyrene.

A message from Haas Door

People make the difference. From production, to shipping, to drivers, to dealers, and installers, it's the people and their dedication that make Haas products the best quality in the industry. www.haasdoor.com

Service Spring promotes service centers and user-friendly apps

Service Spring has hundreds of springs, standard replacement parts, operators, and garage door sections available for same-day pickup at their numerous service center locations across the United States. The company's newest service center opened in March 2020 in Phoenix, Ariz. and also offers the same extensive inventory of products ready-for-pickup.

As a leading manufacturer of torsion and extension springs, Service Spring is committed to its mission to become the "Supplier of Choice" by offering quality service and innovation. The company's service centers play a critical role by enabling them to quickly distribute products to their customers.

The SSC Spring Engineering and Part Resources apps are also valuable resources for its customers. The SSC Spring Engineering app allows customers to convert, design, and engineer springs, calculate pull, determine lift of a spring/drum, and more.

The SSC Resources Part app allows users to easily search for parts and products and to view images, manuals, and sell sheets from a mobile device.

▲ **NEW PHOENIX SERVICE CENTER:** Hundreds of products, including garage door sections, available for pickup.

A message from Service Spring

Service Spring is a garage door spring manufacturer that offers an impressive inventory of products and exceptional customer service. The company operates service centers in Chicago, Ill.; Detroit, Mich.; Orlando, Fla.; and Phoenix, Ariz.; and operates a second spring manufacturing facility in Visalia, Calif.

Miller Edge debuts RLC light curtain

Miller Edge announced that its new non-monitored light curtain, the Relay Light Curtain (RLC), is now available and is offered in two models: RLC-K36 (3' model) and RLC-K72 (6' model). The RLC replaces the recently discontinued LC-K36 and LC-K72 models.

The RLC is a non-monitored fail-safe light curtain that can serve as added protection for any installation. Similar to the Monitored Light Curtain, the RLC features multiple thru-beam photo-eyes that provide vertical protection for protruding parts that may not be detected by a single-beam photo-eye.

A message from Miller Edge

Miller Edge will be launching new products and customer programs in 2021. A new promotion is available through the company's MyEdge online customer portal. Users can also utilize this platform to view their account history, place orders online, download resources, and access exclusive promotions, programs, showroom displays, and vehicle decals. www.milleredge.com

MIDLAND[™]
GARAGE DOOR MFG CO

Midland Garage Door has been the answer for our customers for over 42 years and although the past year presented everyone with new challenges, Midland has continued to provide unmatched quality, service, and value with virtually no interruptions.

So, stop searching and let Midland be the answer your business is looking for.

midlandgaragedoor.com | 800.437.4056

Midland announces new and updated products

Midland Garage Doors recently launched its new Recessed Long Panel design, which features an updated look for the traditional panel style. The new design will be available for Midland's ThermoGuard, ThermoSteel, TS-138, and Series 24 doors.

The company also introduced its FullView Stylist Lite and Stylist XL door options. FullView doors feature a modern look with horizontal glass and minimal stiles. Single-panel designs up to 10'2" and two-panel designs up to 18'2" are available.

Midland also expanded its TS-138 lineup to include 10 standard color options, including black and woodgrain colors. The new TS-138 options are ideal for the cost-conscious customer looking for a sandwich door featuring a variety of design and color options.

A message from Midland Garage Doors

Throughout 2020 and 2021, Midland has maintained standard lead times without sacrificing quality and service. While challenges remain, the company is dedicated to providing the products its customers need.

Clopay highlights new and expanded product lines

Clopay recently unveiled Bridgeport, a new collection of Intellicore insulated-steel garage doors. Bridgeport doors feature a classic stile and rail-recessed panel design and are now available in narrow and extended width styles.

The doors come in 10 standard paint colors and four Ultra-Grain wood-look finishes with optional windows and decorative hardware. Bridgeport doors feature clean, simple lines and are ideal for traditional, contemporary, cottage, farmhouse, and transitional homes.

Clopay also expanded its Canyon Ridge Louver-style garage doors. The composite line offers energy-efficient and low-maintenance, wood-like door options and can be configured with a combination of louvers, flush panels, or crossbucks to match a variety of architectural designs.

Later this year, the company will introduce more options to its Avante AX and commercial Model 904 aluminum and glass garage doors with WindCode reinforcement. The Avante collection will include impact-rated options and a new frame design that eliminates the center stile.

► **BRIDGEPORT COLLECTION:** Available in 10 standard paint colors and four woodgrain finishes.

▼ **ENERGY-EFFICIENT:** Canyon Ridge Louver-style doors.

A message from Clopay

Clopay's new product offerings are examples of how the company continues to expand its product line and adapt its time-tested, industry-leading technologies such as proprietary moisture-resistant woodgrain composite material, Ultra-Grain finish, and Intellicore insulation. www.clopaydoor.com

E2 Homes chose Canyon Ridge® Modern garage doors for The 2021 New American Remodel®, a reimagining of a 1973 mid-century modern lakefront home that draws an architectural lineage from Frank Lloyd Wright.

For more information: **(800) 628-3667 • (817) 834-7300**

National Door promotes polymer window and on-trend hardware

National Door promoted its polymer impact-resistant frame (PIRF) assembly. The new frame design is described as “the next generation of impact windows for O.E.M. customers” by National Door President James Webb. The PIRF is 60% lighter than their aluminum window, which reduces shipping and additional product costs.

National Door offers a variety of custom frames and inserts with color matching options. Its window products also feature state-of-the-art injection-molded residential frames that are ideal for high-heat environments.

The company also offers a line of high-performance polymer carriage door hardware available in both screw-on designs with a variety of screw options and lightweight magnetic versions.

A message from National Door Industries

National Door Industries offers an extensive line of window solutions and door products and is the largest supplier of garage door lubricants in the industry. Since 1968, its manufacturing facilities have grown from a 6,000 to 100,000-sq.-ft. warehouse facility. Today, the company serves garage door manufacturers and thousands of dealers in the United States and abroad. www.natdoor.com

GUIDE 2021

Controlled Products emphasizes inventory and service

Controlled Products Systems Group (CPSG) is more than just a distributor of door, gate, and access-related products. With 35 locations nationwide, the company offers the inventory and product expertise their dealers need to deliver exceptional value, service, and support to their customers.

CPSG locations are stocked with commercial and residential door operators, parts, and accessories (including springs). Each location offers will call pickup and on-demand technical support from trained technicians and industry experts.

CPSG is also proud to support the Connect to myQ + Key by Amazon Program. It rewards dealers with financial incentives from CPSG and LiftMaster for every residential door operator connected to the Amazon in-garage delivery program. The program, which runs throughout 2021, also offers installing technicians a chance to win \$10,000.

A message from Controlled Products Systems Group

CPSG provides various access control solutions including gate and door automation, crash/hostile vehicle mitigation, RFID, and visitor management. The company also has industry experts in the field who can help guide its customers through their projects. www.controlledproducts.com

Wayne Dalton launches security shutter system and enhances ADV-Xtreme models

Wayne Dalton introduced its new Model 523RX residential rolling security shutter door and operator solution designed for residential properties in high traffic areas where access needs to be controlled from a street or driveway.

523RX is ideal for urban and suburban areas, and the door is available in a variety of colors. The system is UL 325-listed and comes with a Genie DC operator featuring battery backup for operation during short-term power outages.

The company also announced that its Model 881 ADV-Xtreme is now available in stainless steel. The new option provides better protection against bacteria growth for common Model 881 applications such as food processing facilities and other installations with frequent washdowns.

New enhancements to the Model 883 ADV-Xtreme include larger size options and increased wind load.

A message from Wayne Dalton

Wayne Dalton recently partnered with Lowe's Home Improvement stores to sell Wayne Dalton garage doors through Lowe's locations nationwide. Select models are now available through the Lowe's Home Services program. Wayne Dalton doors purchased from Lowe's will be installed and serviced by local independent dealers. www.wayne-dalton.com

THE BRADBURY GROUP

bradburygroup.com

+1.620.345.6394

Bradbury Group showcases adaptive technologies

The Bradbury Group has adapted its Auto-Anti Flare fixture technology to address flare conditions in garage door section forming applications. Auto-Anti Flare was originally developed for the Bradbury QTR roll former purlin and has been field-proven over the past 17 years.

Auto-Anti Flare provides hands-off, real-time section flare correction and can be configured in three ways:

1. with presets for product specific material and gauge,
2. with laser sensor rail-to-web angle validation that signals go/no-go conditions, or
3. as a closed loop system that automatically adjusts for out-of-tolerance flare conditions in real time.

Bradbury also highlighted its hydraulic e-Drive leveler with Flat Trak CL monitoring system. These exciting new technologies are applied during the sectional door manufacturing processes.

The e-Drive is a closed loop system that reads leveled strip flatness and adjusts the leveler in real time to maintain flatness within a range. The same technology can be used to induce a specified degree of edge wave in material to address quality concerns inherent in formed door sections.

A message from The Bradbury Group

Bradbury offers total solutions for your garage door manufacturing needs, including sectional, slat, strut, track, stile, angle, and bottom bar roll-forming lines, and more. www.bradburygroup.com

C.H.I. adds new product colors and DoorVisions features

C.H.I. added two new color options to its residential door line: Carbon Oak and Graphite. The colors complement popular trends in both contemporary and traditional home facade designs.

Carbon Oak features rich deep gray and black wood tones with a non-repeating woodgrain to achieve the look of a handcrafted wood garage door. Both color options can be found in five different C.H.I. product lines.

C.H.I. also enhanced its DoorVisions online design platform dedicated for homeowners, dealers, and business owners. New features include realistic images; section, stack, stamp, and window placement options; and accurate size renderings of its residential and commercial doors.

DoorVisions is also integrated into the C.H.I. Hub Quoting system, which enables dealers to project leads and create accurate and professional-looking quotes for their customers. It also allows homeowners to accurately quote potential renovations.

A message from C.H.I.

The C.H.I. team is committed to partnering with installing dealers and providing them with the products and services they need. The company is excited to introduce new and enhanced Dealer Tools that engage customers through every step of the shopping and quoting process and streamlines the overall experience for their dealers. www.chiohd.com

DOORKING®

DoorKing introduces two new products

DoorKing launched the Model 6006 swing gate actuator. The new operator is designed for residential and light-duty commercial applications and is the latest addition to its extensive line of vehicular gate operator products.

The 6006 is built to handle gates weighing up to 1,600 lbs. and/or up to 18' in length. The new system can be powered with 115 VAC or 24 VDC solar and is equipped with a built-in battery backup.

DoorKing also announced that the DKS Cloud is available. The new server is a hosted solution that allows managers to program their DoorKing telephone entry and access control system databases from anywhere and at any time using any internet-connected device.

It replaces traditional PC-based methods and requires no additional software. Plus, there are no additional fees for the DKS Cloud with a DoorKing internet, cellular, or IM server hosting subscription.

A message from DoorKing

DoorKing is one of the few access control companies that still manufactures its products, including gate operators, telephone entry systems, and circuit boards, in the United States, at their Inglewood, California facilities. They are proud that its employees have been manufacturing and designing products on American soil since 1948. www.doorking.com

Amarr unveils on-trend color option and Full View doors

▲ **NEW AMARR 3552I:** Stay safe and secure with style.

Amarr announced that a new Weathered Gray color will be available in summer 2021 for its Classica, Lincoln, and Hillcrest collections. The on-trend color option is ideal for floors, cabinets, and Amarr's carriage house, traditional, and modern garage doors.

The company also introduced their 3552I Full View commercial doors, which combine a stylish design with protection against high wind pressures and windborne debris.

3552I Full View doors are ideal for commercial buildings in high-wind locations and feature Amarr's ClearView Impact strut system. ClearView allows natural light to filter in and does not limit the viewable areas of the patent-pending, low-profile impact glazing retainers.

◀ **WEATHERED GRAY:**
Coming in summer 2021.

A message from Amarr

Amarr, founded by the Brenner family in 1951, celebrated its 70th anniversary in 2021. The company wishes to express its appreciation for all the dealers who have supported Amarr throughout the past 70 years. www.amarr.com

Let there be light.

The three-section tall **Amarr Classica® Full View** with windows in all sections allows maximum natural lighting to interior spaces. The contemporary design in low-maintenance steel and polyurethane insulation provides the care-free operation consumers want.

Visit amarr.com or call 1.800.503.3667 for more information and to locate the nearest Amarr Door Center.

MAKES ALL THE STOPS.

Garages are for cars, tools and garden hoses, not dirt, bugs, wind, snow or water. Our patented Uniflex™ Garage Door Thermostop® seals out what you don't want. Plus, it delivers outstanding flex adhesion and minimal distortion right out of the box.

- 32 colors: 21 standard and 11 Solar Reflective™
- 3 widths: Standard 2", R&R 2 5/8" and 3 1/4" Architectural

GUIDE **2021**

Royal touts comprehensive, design-driven product line

Royal Building Products offers a broad range of high-profile, low-maintenance trim, molding, siding, and decking products for every type of home and the widest selection of weather seals and door stops in the industry.

◀ **COLOR CHOICES:** 11 solar-reflective colors and 21 standard colors are available.

The extensive color options for Royal Solar Reflective (RSR) Garage Door Weather Seals and Garage Door Stops are engineered for dark color performance and are designed to complement today's garage door color trends. RSR Garage Door Weather Seals reflect infrared light to achieve the lowest heat buildup of any cellular garage door stop on the market.

Royal Garage Door Stops feature a patented Uniflex technology and are available in a variety of profile sizes, including Uniflex Standard 2", Uniflex Repair & Remodel 2-5/8", and Uniflex Architectural 3-1/4".

A message from Royal Building Products

For over 50 years, Royal Building Products has advanced the aesthetics, versatility, performance, and breadth of its products to industry-leading levels. The company's comprehensive product portfolio is driven by design. www.royalbuildingproducts.com

Airlift Doors highlights roll-up door and Magnaglide opener

Airlift Doors highlighted its XRS high-speed vinyl roll-up door. The corrosion-resistant, low-maintenance door features a unique safety breakaway design that automatically resets in the track. The XRS offers a complete weather seal, adjustable speed options up to 34" per second, individually replaceable sections, and a variety of door color options.

The company also promoted its Magnaglide Air Opener. The direct drive opener features an exclusive design that never jumps doors cables and is ideal for carwash and other high-cycle applications. Additional features include a corrosion-resistant, low-maintenance design and a three-year unconditional warranty.

A message from Airlift Doors

Airlift Doors is the largest manufacturer of polycarbonate doors and air-powered openers. As a leading commercial door manufacturer for over 35 years, Airlift is proud to offer superior quality products, unparalleled warranties, and a strong distribution network across the United States and overseas. www.airliftdoors.com

Arrow Tru-Line celebrates its employees

Recognizing the many challenges of 2020, Arrow Tru-Line continues to recognize the dedication of its team members. Due to COVID-19, 2020 was particularly trying on Arrow managers, workers, and the industry overall.

Arrow is proud of the way their team pulled together to meet the challenges and demands of these times. Arrow's 2020 marketing campaign was a tribute to its dedicated employees, highlighting the difference-makers in each ad and declaring that its biggest strength is their hard-working, capable employees who promote innovation and teamwork.

According to Arrow Tru-Line President Tom Brockley, "When you work with Arrow Tru-Line, you're not only working with the best, you're working with family."

A message from Arrow Tru-Line

Since 1970, Arrow Tru-Line has been a leading manufacturer of garage door hardware, weather stripping, window solutions, and a comprehensive line of hardware accessories, including track, springs, hinges, struts, locking components, brackets, rollers (its best-selling product), and more.

BEA showcases a wide variety of sensors

BEA's LZR-H100 is a laser-based Time-of-Flight sensor designed for gate and barrier applications. The LZR-H100 is an effective alternative to induction loops that eliminates the need to cut into the ground. It features a highly configurable three-dimensional detection zone that can be set up for activation and presence detection for vehicle sensing applications.

BEA's FALCON family of sensors is a premier microwave activation solution for indoor and outdoor industrial applications, including automatic industrial doors, vehicle detection, barriers/gates, loading docks, and other locations where motion detection is required.

The FALCON overhead activation sensor provides pedestrian and cross-traffic rejection, reducing unwanted detections in industrial applications.

▲ LZR-H100: No cutting required with BEA's laser-based solution.

► FALCON FAMILY: Includes sensors for extra low mount and wide detection areas.

A message from BEA Sensors

In May 2021, BEA will conduct a virtual event bringing industry experts and manufacturers together to discuss application challenges, codes and standards, and new products. www.beasensors.com

YOUR SOLUTIONS PROVIDER FOR TOUCH-FREE ACTIVATION & SAFETY

Touchless

Hygienic

Innovative

Now more than ever, we are realizing how door handles, push buttons and pull-cords are unnecessary breeding grounds for bacteria, germs and viruses. BEA develops innovative motion and presence sensors that reduce nonessential contact and provide safety for everyone, everywhere.
