

## QMI launches high-security door system

In November, QMI Security Solutions introduced the DoorSafe system. The heavy-duty, high-security commercial steel door system with a retrofittable swing door is designed to prevent cutting, prying, drilling, and impact breaches.

Features include a patent-pending anti-cut technology to prevent saw attacks, integrated anti-drill plates to defend against breaches, an interlocking astragal to protect from pry attacks, and a stainless-steel continuous hinge.

Options include delayed egress with alarm, external key card access, and external keyed lock with a breakaway handle. Double doors, custom sizes, and multiple colors are available. [www.qmiusa.com](http://www.qmiusa.com) ■

## Lawrence Doors introduces “explosion-proof” operator line

In November, Lawrence Doors introduced a new line of NEMA 7/9-rated “explosion-proof” service and fire door motors. These operators are the first of their kind to be UL listed and approved for use in an expanded group of hazardous locations.

The new N79 models mirror the functions and features of the current Lawrence SGH service door operator and the FGH “Easy-Reset” and FS “Auto-Reset” fire door operators. All three N79s include an integrated control panel and an intrinsically safe circuit.

The two fire door models incorporate an internal release and governor, which eliminate the need for an external drive release and mechanical governor system commonly found on fire doors with traditional explosion-proof operators. They will also be added to the current offering of retrofit fire door operators for use on existing fire doors. [www.lawrencedoors.com](http://www.lawrencedoors.com) ■

## Re-Source announces several new RDRG hoists

In November, Re-Source Industries announced the addition of several new RDRG hoists to its chain hoist line. Their “RDRG Series” of rolling door-rolling grill gear chain hoists are now available in the following reduction options: 10:1, 12.7:1, 16:1, and 20:1.

The expanded line of RDRG hoists are made of heavy-duty cast gear construction with a head plate mount for weld-up or bolt-up installation. They feature integral cast-iron gears and come with 26' of hand chain and a chain keeper. [www.resourceinds.com](http://www.resourceinds.com) ■

## Haas Door expands American Tradition series

In September, Haas Door revealed an upgrade to their American Tradition Series doors. The steel doors will be offered in a maximum width of 18'2" and a maximum height of 16'. The base door is 1-3/8" thick. When overlay boards are added, the total combined thickness is 2".

The woodgrain embossed door is available in Almond, Bronze, Brown, Charcoal, Carbon Black, Gray, Polar White, and Sandstone as well as several woodgrain finishes, including Mahogany, Ash, American Walnut, and English Oak. Customers can also mix and match woodgrains and solid color options. Powder coatings are available for hardware, track, springs, end stiles, and struts.

Additional new features include lites in the top two sections of the 9600 Series, single and double arch windows for double doors, and specialty and impact glass options. [www.haasdoor.com](http://www.haasdoor.com) ■

## CornellCookson offers new wiring diagrams

In November, CornellCookson introduced new wiring diagrams designed to ease labor and electrical installation challenges. The detailed diagrams serve as a quick field reference for CornellCookson's most commonly used electrical options with branded motors, including FireGard, MG, and SG. Project and order-specific diagrams are available.

The diagrams also enable installers to easily wire timers, card readers, loop detectors, wireless edges, light curtains, and more. They are shipped in the hardware package. [www.cornellcookson.com](http://www.cornellcookson.com) ■

## Re-Source expands AGD hardware

In November, Re-Source Industries added a new line of America Garage Door (AGD) magnetic decorative garage door hardware. The new AGD hardware is easy to install and leaves no residue or marks on the door panels; customers can easily swap or rearrange the hardware at any time.

Additional features include an authentic wrought iron appearance, light weight, custom-formulated injection molded parts, and neodymium magnets. The hardware is also resistant to salt spray, environmental chemicals, extreme weather conditions, or rust.

## Haas Door adds new window options

In November, Haas Door expanded its window options for raised panel garage doors models to include carriage house, ranch, and standard windows. The new glass options allow more light into a garage and can be placed above Raised Ranch, Sculptured Raised, and Raised Standard door panels.

The new window options are available in Haas' residential and commercial 600, 700, 2000, and 5000 insulated Series. [www.haasdoor.com](http://www.haasdoor.com) ■

## Securam unveils EOS Wi-Fi Smart lock

In November, Securam Systems released its EOS Wi-Fi Smart lock. The new Smart deadbolt securely attaches to a door and can be controlled remotely using the Securam Guard application. The remote connectivity is protected via AES 128-bit encryption, which provides an additional layer of security.

The EOS is ideal for residential applications and does not require the additional Smart Hub to connect to a home's wireless network. It connects to networks directly and is compatible with both Amazon Alexa and Google Home. [www.securamsys.com](http://www.securamsys.com) ■

## Clopay announces Lustra matte finish option

In November, Clopay Corporation added its Lustra matte paint finish to select residential Modern Steel and commercial Architectural Series door models.

Lustra is a low-gloss finish with a completely smooth 24-gauge steel panel design featuring no embossed woodgrain or stucco surface texture. The new finish is offered in three colors: Black, Charcoal, and Silver, and is currently available on Clopay's 2"-thick polyurethane foam insulated door models (9208/9209 and 3728/3729).

Window options include long or short plain windows with matching Lustra finished frames and Contemporary Slim windows offered in standard black or aluminum frames. [www.clopaydoor.com](http://www.clopaydoor.com) ■

## Two CornellCookson rolling doors receive TDI approval

In November, CornellCookson announced that the Extreme 300 Series and Extreme 1024 High-Performance rolling doors were granted TDI approval. Both doors offer advanced performance in security and productivity, and they are now officially considered effective against hurricane-speed winds.

During testing, the door assemblies passed the equivalent

of Missile Level E as specified in ASTM E 1996-14a. Extreme 300 Series and Extreme 1024 High-Performance rolling doors are operational up to 10 PSF maximum wind load, and the Extreme 300 Series door remains static in up to 50 PSF design wind load. These results comply with TDI standards assuring the doors remain secure and can resist high pressure, intense weather situations. [www.cornellcookson.com](http://www.cornellcookson.com) ■
