The *D+AS Show Guide* is a special DASMA publication that highlights key exhibits and products featured at the IDAExpo and AFA Fencotech shows. This year's *Show Guide* includes information about the companies and hot products that you may have missed from the shows.

Our Pages feature industry companies that invested in this extra effort to inform you of key announcements, services, and products that were showcased at their exhibits.

Our Readers are 20,000 professionals in the door, gate, and access control systems industry throughout North America.

Our Advertisers are DASMA members and industry companies that exhibited at the 2022 EXPO and/or Fencotech events. To learn about advertising in the next *Show Guide*, visit www.dasma.com and go to the Publications/D+AS Show Guide page.

Amarr debuts contemporary residential and commercial doors

At Expo, Amarr unveiled new aluminum full-view models, including the 3552 heavy-duty commercial door and the Vista residential door. Both models feature clean lines and glass expanses that reflect the modern architecture seen in many commercial buildings and contemporary residential homes.

The Amarr 3552, shown with black anodized finish and gray tint reflective glazing, transforms any interior into a bright and inviting space. The door's reflective coating provides privacy and improves energy efficiency by reducing solar heat gain coefficient by over 50% compared to clear glazing.

The new Amarr Classica Flush three-section overlay door was also on display. Features include taller flush panels for a contemporary look and energy-efficient polyurethane insulation to help moderate garage temperatures.

◀ AMARR 3552: Displayed with black anodized finish and gray tint reflective glazing.

A message from Amarr

Amarr's focus is bringing innovation to the market, continuing this year with modern, contemporary looks for both residential and commercial products driven by consumer demand. www.amarr.com

Let there be light.

The three-section tall **Amarr Classica® Full View** with windows in all sections allows maximum natural lighting to interior spaces. The contemporary design in low-maintenance steel and polyurethane insulation provides the care-free operation consumers want.

Visit amarr.com or call 1.800.503.3667 for more information and to locate the nearest Amarr Door Center.

MOVING FORWARD

Arrow Tru-Line maintains superior service with innovative automation

Arrow Tru-Line promoted its superior service and quality manufacturing. The company philosophy is to build products correctly from the start. They recently invested millions of dollars in their workers and factories, purchasing three new pieces of equipment to help improve efficiency.

As labor challenges and supply chain issues persist, Arrow Tru-Line continues to evolve and adapt, implementing unique automation and innovative procedures to keep manufacturing processes going, so that their customers receive the products they need. Communication with its dealers has been the key to the company's continued success.

A message from Arrow Tru-Line

"Everyone in the industry is facing the same challenges. We just feel that Arrow Tru-Line offers higher quality, competitively priced garage door hardware products, and unbeatable nationwide sales and services through our extensive distribution network across North America," said Vice President of Sales and Marketing John McLaughlin. www.arrowtruline.com

Raynor highlights united team and comprehensive product portfolio

“Deep roots make for strong branches” was the theme of the Raynor Worldwide booth. With four generations and now three distinct and complementary brands under Raynor Worldwide, the company showcased a united family of brands and diverse product lines.

Raynor Worldwide is comprised of Richards-Wilcox, ProDoor Systems, and Raynor Garage doors, which allows the company to leverage all three brands within its manufacturing capabilities to provide a unique and comprehensive residential and commercial product portfolio.

The new Aspen Contempra Model from Raynor was one of many doors featured in their booth. The AP200 steel residential garage door, displayed with a 2" Aspen base, low profile, narrow frame, and sleek window design, combines modern architecture and best-in-class energy efficiency.

A message from Raynor Worldwide

“Raynor Worldwide has been involved in the business for the last 77 years. Our loyal dealers are an important part of the Raynor Worldwide family. We value their partnership and are committed to providing industry leading support through service to drive mutual success.” —Chairman and CEO Ray Neisewander III www.raynor.com

Miller Edge introduces RBand for door industry

Miller Edge, North America's largest manufacturer of door and gate sensing products, was represented at Fencetech and Expo. Their sizable booth in Las Vegas focused on mainstay safety products and their new wireless system – RBand for Doors.

RBand for Doors is designed to ensure stable, reliable performance regardless of the installation environment or the amount of ambient RF interference. RBand features self-assessment firmware and variable signal power output functionality, making it the most advanced and dependable wireless system ever offered by Miller Edge.

Miller Edge light curtains are ideal for environments that require expanded protection for protruding parts that may not be detected by a standard single-beam photo-eye mounted six inches from the

floor. The Miller Edge Monitored Light Curtain has proven to be reliable, competitively priced, and easy to install.

A message from Miller Edge

Over the last three years, Miller Edge has significantly expanded our marketing services and tools. From showroom displays, custom targeted promotional programs, and the launch of the MyEdge dealer portal, we offer an extensive arsenal of marketing tools to help dealers grow their businesses. www.milleredge.com

C.H.I. OVERHEAD DOORS

C.H.I. Shoreline and Sterling doors turn heads at Expo

C.H.I. added two new colors to its Shoreline Overlay carriage house doors. Their Shoreline doors are now available in four accent woodtone options: Cedar (new), Dark Oak (new), Driftwood, and Walnut.

Shoreline Overlay doors offer the classic appearance of real wood without recurring maintenance. They feature high-definition designs overlaid on Accents Woodtone base sections, for a factory-finished Woodtone option.

C.H.I. also showcased a unique door from their Contemporary Collection — the Sterling. The glass and steel Sterling door was displayed with Infinity windows. The cutout viewing behind tinted solid glass panels offers visibility and a sleek modern look.

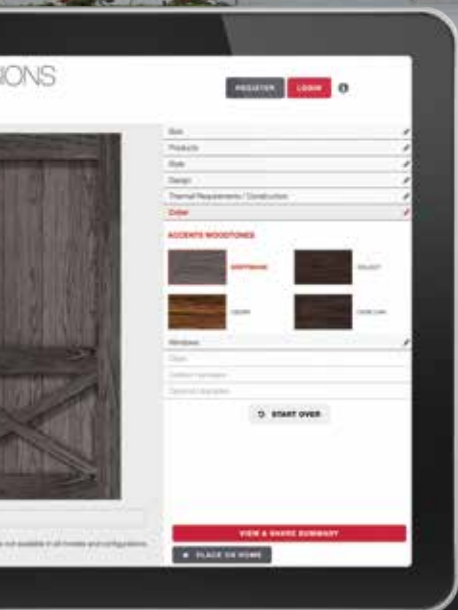

▲ **SHORELINE DOORS:** Available in two new colors: Cedar (shown above) and Dark Oak.

A message from C.H.I. Overhead Doors

C.H.I. was built on the idea that garage doors should be exceptional in quality, craftsmanship, and value. Today, we celebrate our heritage, tradition, and values while also focusing on supporting our network of professional dealers. www.chihd.com

Skylink unveils new ATR garage door opener

Skylink highlighted the new ATR-6912P garage door opener, featuring a powerful yet quiet 1-1/4-HP motor that can be used on both the smallest and the heaviest of doors. With two built-in LED lights, this new model offers even more light coverage plus the convenience of never having to replace a light bulb.

The versatile garage door opener offers one machine for all your customers' needs and can be customized to fit a variety of requirements. With 1200N of lifting power, the ATR-6912P motor can be used on chain or belt drive rails to open any size of door and can be customized with several optional upgrades. Add a camera, a built-in battery backup, or a Wi-Fi connectivity option that allows users to monitor and control the door from anywhere using a smartphone.

▲ **VERSATILE:** All you need is one.

A message from Skylink Group

Skylink Group aspires for excellence in every aspect. From products to customer service, we strive to not only meet but exceed our customers' expectations in everything we do. For additional information, please contact 1-888-272-8667. www.skylinkhome.com

Action Industries' booth drives traffic

Action Industries announced its new partnership with the Kaulig Racing Team in the NASCAR Xfinity and Cup Series. Their booth featured racecar driver A.J. Allmendinger's #16 Chevy Camaro outfitted with Action Industries branding. The car debuted at the Alsco Uniforms 300 at the Las Vegas Speedway on March 5, 2022.

The company also showcased its new patent-pending two-in-one retainer and weatherseal for garage doors — the E-Z Zip Coiled Push-In Bottom Seal. The innovative design eliminates the need for retainers, streamlining installation and saving money.

The E-Z ZIP seal is offered in 1-3/8" and 2" sizes and arrives ready to install. Simply uncoil and begin installing to the bottom of a door with the self-tapping fasteners. Coil lengths ranging from 10 to 150 feet are available.

A message from Action Industries

At Action Industries, we strive to win at the game of business. With 16 NASCAR wins since being founded in 2016, the Kaulig Team is a perfect fit. We are excited to partner with a team with similar winning values and for the opportunity to put our brand in a new spotlight. www.action-ind.com

CAPTURE THE CHECKERED FLAG

WITH EVERY PART FOR EVERY DOOR

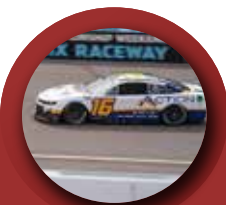

Action Industries wants to be your strategic partner. Our industry-focused technical resources combined with the latest manufacturing and material options allow our customers to design and implement products that differentiate them from the competition. That's the Action Difference.

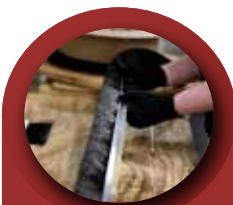

EZ ZIP PUSH-IN SEAL

Action Industries unveils the EZ ZIP. A coiled Push-in 1-Piece Bottom Seal is a patent-pending two-in-one retainer and weather seal for garage doors. Most weather seals on the market require a separate installation of weather seal retainers to hold seals in place. This innovative Action Industries design removes the need for retainers to streamline installation and save money.

NASCAR RACING

Action Industries teamed up with Kaulig Racing to sponsor the #16 car driven by A.J. Allmendinger. NASCAR is one of the most innovative sports in the world, constantly introducing new technologies to improve safety and performance. Similarly, we are always providing our customers with innovative solutions through automation and technical design.

VALUE-ADDED SERVICES

Action Industries provides value-added services for our customers to make the job easier. Value-added services include custom cutting, kitting, punching, and Just-In-Time inventory systems. With a national footprint, Action Industries can provide a quick turnaround on orders by shipping from the warehouse closest to your location.

EVERY PART FOR EVERY DOOR

Action Industries stocks weather seals, brush seals, hardware, radio controls, access controls, repair parts, operators, and more to make our customers' lives easier. Find everything you need for the call regardless of application. With over 150 years of accumulative experience in the industry, Action Industries can source the items needed to get the job done.

ABOUT US

Action Industries is a full-service engineering, manufacturing, and logistics resource for the garage door industry. Our resident experts develop value-added solutions using the latest manufacturing technology and materials in the industry. Our New Product Development team will work with you to design and implement the most cutting-edge products being offered in the industry today. Action's extensive material selection includes Rigid and Flexible PVC, wood-filled composites featuring FIBREX material technology, all major TPE's, high heat deflection materials including ASA, and EPDM. Torsion processes these materials with an expansive range of manufacturing capabilities including plastic and EPDM extrusion, thermoforming, injection molding. Value-added services include: Hot plate weld and clean, window frame assembly, and custom cutting and kitting. Contact Action Industries today!

More control. More options. More peace of mind.

Sommer emphasizes security with new access devices

One of the main attractions at the Sommer booth was the new Telecody Courier — a keypad for in-garage parcel delivery. Using the Telecody Courier, homeowners can grant full or limited access to their garage and customize the height of the opening based on the size of the package being delivered.

The new keypad is retro-compatible with all current generation Sommer operators and can be coupled with SOMweb for active and video monitoring of deliveries. It also serves as standard access keypad for up to 10 doors, and the courier function can be paused at any time.

The ENTRAsys fingerprint scanner was also showcased at the Sommer booth. The highly secure radio transmitter is activated by fingerprint and can store up to 80 fingerprints with up to nine admin prints.

A message from Sommer USA

Sommer's wide variety of radio devices offer reliability, range, and security. Our customers entrust us to keep their belongings secure, and we are committed to being second to none in providing peace of mind to our customers. www.sommer-usa.com

Hörmann displays combined product lines

At Expo, all three products lines of the Hörmann brand across North America were united for the first time. With residential sectional, commercial high speed/high performance, and industrial doors on display, the company presented a comprehensive line of products and demonstrated that they are stronger together.

Their booth featured the recently launched 450U Commercial Polyurethane residential insulated door and the new HD-DD 3065 industrial door. The 450U has an energy-efficient polyurethane foam core, injected between 25-gauge galvanized steel on both sides, and thermally-broken tongue and groove section joints designed to reduce air infiltration and to create a weather-tight seal.

The 3065 HD Series industrial direct-drive rubber door is ideal for applications with harsh, demanding environments, high-traffic conditions, or high pressure or wind-load concerns. The TNR team custom builds the doors for your application.

▲ Shown with micro-groove finish.

► The HD-DD 3065 is one of six new HD Series models available.

A message from Hörmann

The years of innovation and precision engineering inherent in the Hörmann brand are now available across North America. With new product releases for residential, commercial, high performance, and industrial applications, we have the capability to meet any need and are truly stronger together. www.hormann.us.

DoorKing presents 1620 Lane Barrier system

DoorKing showcased its vast product line at both Fencetech and Expo. Their sprawling Fencetech booth featured a wide variety of access products as well as gate and barrier operators, including the recently released Model 1620 Lane Barrier system.

The Model 1620 is ideal for multi-level parking garages, rental car lots, and new car dealerships. It provides a formidable barrier to prevent passenger vehicles and light-duty trucks from compromising a controlled traffic lane without the expense of a crash-rated system. The system uses counter-balance weights, so no hydraulics are involved, making the system environmentally friendly.

DoorKing also highlighted its 2112 Video Entry cloud-based system. Owners can access and program the unit from their laptop, tablet, or smartphone. Additional features include real-time video and broadcast calling up to four phone numbers at once.

A message from DoorKing

DoorKing is one of the few access control companies that still manufactures its products, including gate operators, telephone entry systems, and circuit boards, in the United States, at our Inglewood, California facilities. We are proud that our employees have been manufacturing and designing products on American soil since 1948. www.doorking.com

Clopay expands Lustra options and showcases Shaker-style design

Clopay announced that its Lustra matte paint finish is now available on select residential Modern Steel and commercial Architectural door models and comes in three colors: Black, Charcoal, and Silver.

Lustra is offered on the Clopay 2"-thick polyurethane foam-insulated door models 9208/9209 and 3728/3729. Their booth showcased the Modern Steel 9208 door with Lustra Black finish and Contemporary Slim windows in silver. The low-gloss finish paired with 24-gauge steel creates a smooth flush panel design.

The Shaker-style fiberglass entry door, paired with a matching garage door, captured the attention of Expo attendees. The garage door was displayed in Reserve Extira, a custom wood alternative that offers the beauty of wood in a weather-resistant paint-grade material with a grain-free smooth surface.

A message from Clopay

We are expanding our fiberglass entry door design options, adding a new Shaker style as well as a stainable fir woodgrain Modern door in 2022 to complement our residential garage doors. www.clopaydoor.com

Marantec maveo pro service takes center stage

Marantec's exhibit demonstrated that it is a full-line manufacturer of residential and commercial door opener and access products. At Expo, they announced plans to expand their product line even further with up to 24 operators rolling out by the end of 2022.

While the operator line impressed attendees, it was Marantec's new maveo pro service that took center stage. The maveo pro service allows dealers to configure door openers from a smart phone and enables remote monitoring of GDOs, allowing users to identify failures before they occur.

Marantec designed maveo pro with dealers and service technicians in mind. Its powerful dashboard enables users to manage, organize, and remotely diagnose all garage door openers from anywhere at any time, with one single simple interface.

The new plug and play WiFi adaptor — the maveo bluefi stick — can be easily added to Marantec openers to enable wireless connectivity and operation via a smartphone.

A message from Marantec

We are strengthening our product lines to align with customer needs while actively enhancing our support ecosystem to provide exceptional service. In addition, we are excited to bring manufacturing back to our headquarters in Gurnee, Ill. www.marantecamerica.com

Jamison Door's high-speed industrial doors shine

Jamison Door highlighted their high-speed industrial doors with enhanced product displays. They also introduced their one-of-a-kind DynamicRoll B-Drive self-repairing high-speed industrial door. The new door is safe and fast thanks to a system of gears driven by a motor that push and pull the sheet.

The doors of the DynamicRoll series guarantee wind resistance up to 100 mph, making them ideal for outdoor applications with large openings. The unique self-repairing design makes the door easy to clean. If the door curtain comes out of its guides, then the system will automatically reset the curtain back into the guide on the next open cycle.

The ThermicRoll Spiraling door, suitable for both internal and external applications, offers speed, safety, and insulation, with an attractive design. It is a counterweighted door with no springs, and it features a patented CNC machine system to create track grooves, replacing other complex track systems.

► **EASY TO CLEAN:**
The DynamicRoll B-Drive features a self-repairing design.

A message from Jamison Door

Jamison Door experienced no supply chain or labor issues since the pandemic began. With five manufacturing plants, we have maintained four-to-six-week lead times and have expanded in both labor and products. www.jamisondoor.com

GUARDIAN ACCESS & DOOR HARDWARE

EXPO 2022

Guardian launches 928 residential jackshaft opener

Guardian announced the launch of its Model 928 residential jackshaft garage door opener. The 928 has a powerful motor, designed to open garage doors up to 850 lbs. and 14 feet tall. Its versatile space-saving design operates with or without a cable tension monitor and features a battery backup option.

An automatic garage door dead-bolt lock secures the door on closing. The built-in motion-activated LED lighting is bright enough to illuminate the entire garage, provides added security, and saves installation time.

Additional features include a heavy-duty hardened steel collar to hold set screws more securely and to prevent slippage, and a 9' quick-release rope for high-lift or 14' door applications.

Expo attendees appreciate Wayne Dalton demos

The expansive Wayne Dalton booth displayed a variety of residential and commercial products. Throughout the show, employees provided attendees with in-person demonstrations of commercial solutions, such as ADV-Xtreme High Speed Models 881, 883, and 889.

Wayne Dalton commercial high-speed doors feature a springless, helical design that prevents the curtain from wrapping on itself and requires minimal maintenance. Model 889 ADV-Xtreme, popular for auto dealership applications, is a full-view metal door that features clear, scratch-resistant polycarbonate panels.

Several residential doors were also featured in their booth, including Security Shutter Model 523RX, Model 8450 Luminous, Carriage House Steel Model 6600, Designer Steel Model 9510, Classic Steel Model 8300, and Contemporary Aluminum Model 8800.

Luminous Model 8450 was recently honored in the 2021 Most Valuable Product Awards by Products Magazine. The door design, inspired by modern skyscrapers, instantly adds sleek style to any residential setting.

▲ ADV 889 DEMO: Attendees watch on closely.

A message from Wayne Dalton

Since 1954, Wayne Dalton has been built on a dedication to ingenuity and innovation. Today, Wayne Dalton offers a wide selection of garage door designs to complement any exterior and an extensive library of commercial solutions to fit virtually any application. www.wayne-dalton.com

GET UP TO SPEED ON OUR HIGH SPEED DOORS

HIGH SPEED, HIGH PERFORMANCE METAL DOORS

Wayne Dalton's metal high speed doors are our most powerful yet! Made with patent-pending designs and durable construction, our line of high speed doors features two high speed metal doors for exterior applications: **Model 888 ADV-XTREME** and **Model 889 ADV-XTREME**. These doors feature a springless design built for more than 1 million cycles and a preassembled headplate for easy installation. Ideal for exterior applications where aesthetics and visibility are a priority such as auto dealerships, retail, and manufacturing locations.

Model 888 ADV-XTREME

is built for durability and offers a dual-walled solid aluminum curtain capable of withstanding hurricane-force winds.

Model 889 ADV-XTREME

is a full-view metal door with clear vision, scratch-resistant panels and is made for applications where aesthetics and visibility are a priority.

60 years of innovation that's **uniquely better.**

Since 1962, SSC has celebrated four generations of leadership and a core commitment to quality and innovation. That's 60 years of focus on our people, our business, and most importantly, on you, our customer.

servicespring.com | 833.SSC.DOOR

Expo 2022 marks Service Spring's 60th anniversary year

Service Spring Corporation (SSC) highlighted its 60th anniversary year with a festive booth at Expo. In honor of the occasion, the company announced that it will be hosting birthday parties at each of

their service centers throughout the next six months. SSC customers and Expo attendees were encouraged to attend the anniversary events in their areas.

SSC also showcased its extensive line of springs, which are manufactured entirely in the United States and made with the highest quality materials. With seven service centers nationwide, picking up Service Spring products is easy and convenient.

A message from Service Spring

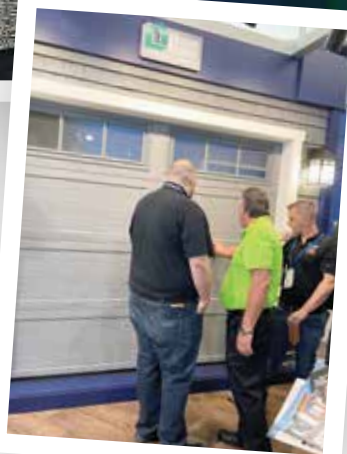

For six decades, the SSC team has provided superior service and quality products. We take great pride in manufacturing our springs in the U.S.A. and serving our dealers. We know that the SSC family is what drives our success. Each one of us helps to make our "American Dream" come true. www.servicespring.com

Haas promotes dealer-focused tools and expanded product options

Haas Door had plenty to share at this year's Expo. The company demonstrated recently launched tools designed to help dealers manage orders. Accurate real-time information, similar to what Haas uses to manage orders, is now available for their customers.

They also introduced a new Graywood woodgrain to their insulated steel product offerings and expanded window ordering options. Graywood features a unidirectional grain with a modern look and consists of a blend of gray tones and a hint of gun metal, which complements the dark grey trends in home exteriors.

The expanded window configurations were driven by customer demand. Customers can now combine Carriage House, Ranch, and Standard Raised panels with three windows.

▲ **GRAYWOOD:** New on-trend woodgrain option.

A message from Haas Door

We hire quality people driven to produce quality products. We don't just say it — we do it. Haas Door supports our people, and our people support our dealers. Our team takes pride in their work and strive to provide the highest quality of product and service day in and day out. www.haasdoor.com

DENCO
Where Door & Gate Pros Go!

Denco highlights dependable team, superior service, and quality tools

The Denco booth experienced a steady flow of Expo attendees who were welcomed by a large group of Denco employees. For 55 years, Denco has been a dependable partner to door and access dealers. The company remains committed to providing exceptional customer service, quality products, and competitive pricing in the future.

Denco's approach to building relationships with their customers make them a standout

supplier. Denco's devoted team works hard to uphold the standards of the company's founder, Dennis Schlabach.

Denco's extensive product line was on full display at the show, and they continue to produce quality, industry-specific tools for the trade. Denco tools are exclusively produced in the United States and help to make a job easy and work more efficient.

A message from Denco

With our diverse product offering, Denco provides any size garage door and/or access dealer the parts they need. Our friendly, knowledgeable staff is always responsive and prompt to our customers' needs.

Garaga Village Collection impresses

Garaga presented two showstopping designs from its Village Collection. The booth featured its Village carriage house style door with an X-shaped inlay design in Dark Walnut. The inlays and the skin are both made with the same steel for a perfect match.

The product is available on their complete line of residential doors, from the 25-gauge pan product to vinyl back to Garaga's Vantage sandwich door. The Village doors can be ordered in a wide variety of configurations and are offered in nine color options, including Black Ice, Cherry, and Dark Walnut.

The 2" tongue and groove meeting rail provides a weathertight seal between sections and adds a touch of elegance to any home at a very competitive cost.

myQ® Community
Web-based platform
for property managers

**Smart Video Intercom - M
CAPXM**

myQ® Community
Mobile app for residents

Modernize your property's access control with a Smart Video Intercom.

Powered by myQ, LiftMaster's award-winning Smart Video Intercoms are a cloud-based, scalable access solution ideal for multi-family properties. Residents can see who's at the door, unlock authorized entrances including the parking garage and elevators, and send virtual keys to their guests all from their myQ Community smartphone app. Managers can secure their properties with streamlined management of entrances, video monitoring capabilities and convenient video logs of access events for increased safety.

For more information, visit myQ.com/Community

LiftMaster®

POWERED BY myQ®

LiftMaster shares video-driven products

The LiftMaster booth featured a multitude of operator and access products, including the Secure View garage door opener and the new Smart Video Intercom — S (CAPXS). Powered by myQ, the CAPXS is a simple, cloud-based video intercom that allows owners to remotely manage access points.

Additional features include an integrated camera that enhances security and allows residents to interact and open the door for visitors via their smartphone and the myQ Community app. Live video streaming and the capability to record video clips allows property owners to trace property damage, vandalism, and other nuisances.

The system requires only an internet connection, electronic/lock door strike system, and power to run, reducing the need for extensive wiring and in-unit hardware.

◀ **SECURE VIEW:** The first garage door opener to come with remote diagnostics.

A message from LiftMaster

We are redefining how property managers and residents use and control common community entry points with our Smart Video Intercoms, which include a combination of innovative myQ technology and reliable hardware for a scalable access system with video monitoring capabilities. www.liftmaster.com

Midland enhances doors with new panel design, color, and larger windows

Midland Garage Door's modern new booth design served as a perfect platform to exhibit its extensive line of residential and commercial door products. At Expo, the company presented some of the options they have recently added, including their Long Recessed Panel design, Weathered Oak color, and larger window size. While the larger windows offer more light, the additional options provide homeowners with more possible ways to find a door that matches their style.

Midland used a Long Panel Carriage door, displayed in Weathered Oak and double dark glass, to highlight two new options while using a black ThermoSteel door with double dark glass to showcase their new Long Recessed Panel design and larger window size.

A message from Midland Garage Door

We have always promised to offer quality, service, and value. With the industry's challenges these past two years, it has never been more important for us to do everything we can to take care of our customers. www.midlandgaragedoor.com

What does your future hold?

We've **ALL** faced challenges this year that have forced us to ask "what's next?" Although we don't have all the answers, we remain committed to doing everything we can to help our customers navigate whatever challenges are ahead.

**When the time is right, we hope you
consider Midland in your future.**

ARROW
MOVING FORWARD

(877) 285-7253 • ARROWTRULINE.COM

Arrow Tru-Line highlights hardware and “hardware guys”

Arrow Tru-Line, a leading manufacturer of garage door track, launched a new Expo booth featuring the company's “hardware guys.” The Blues Brothers-inspired booth displayed a wide variety of both vertical and horizontal track systems and additional hardware products.

Featured prominently were 2-ft.-long samples of 2" and 3" vertical track and 2"-12R horizontal track with 22" angle attached. The horizontal track can be ordered with any gauge.

The company also showcased its extensive line of struts, offered in a wide variety of sizes. A 2-ft. piece of a 2-1/4" 22ga HD strut and a 2-ft. piece of 3" struts were on display. Additional sizes from 2-1/4" 22ga to 3" 20ga sizes ranging from 8' to 32' are also available.

A message from Arrow Tru-Line

Arrow Tru-Line is continually evolving and advancing our technology to produce even better garage door hardware. We understand the needs of our customers and know that without our superior team, we would become just another hardware producer. www.arrowtruline.com
