

### DoorKing unveils 2112 Video Entry system

In April, DoorKing launched the Model 2112 eVolve, a video telephone entry system for residential applications. The 2112 is an advanced cloud-based system that operates on an internet or cellular connection. The companion DoorKing apps, available free of charge for both Android and iOS, provide video calling and relay control, programming, event logging, and more for system administrators.

The 2112 can control up to three entry points and features broadcast calling, which allows up to four phones to ring simultaneously when the call button is pushed. [www.doorking.com](http://www.doorking.com) ■

### Rytec introduces SmartSurround detection and alert system

In February, Rytec introduced SmartSurround, a patented, intuitive object detection and safety alert system now standard on most Rytec Spiral door models. The advanced safety system combines intelligent optical light curtains, LED lights, detection, warning, and signaling capabilities.

SmartSurround provides a visual cue and alerts traffic to door activity near the opening while simultaneously communicating with the Rytec System 4 Door Controller. The integrated communication and recognition technology adjusts door movement and speed based on multiple traffic pattern scenarios.

Customizable, high-intensity LED light settings provide adjustable brightness control, color choice, timing, and flash rates. SmartSurround is ideal for high-traffic areas where both vehicles and pedestrians are present. [www.rytecdors.com](http://www.rytecdors.com) ■

### Nice/Nortek Control launches Soon Pro commercial operator

In April, Nice/Nortek Control launched the Nice Soon Pro commercial door operator. The new all-in-one control unit is reliable, easy to install, and features LED lighting and optional battery backup.

The Soon Pro is designed for sectional doors up to 16' tall with lighter cycles (up to 25). The narrow enclosure and compact size (4.5" wide) make it suitable for applications with tight, limited wall space.

A three-button open/close/stop station comes standard with each Nice Soon Pro. Each operator also features advanced technology that secures the door's positioning without mechanical limit switches and allows for gradual start and slowdown during door operation. ■

### Advanced Plastic releases new press-in astragal and retainer assembly

In January, Advanced Plastic Corp. introduced a new patent-pending press-in astragal and retainer assembly designed to fit all standard residential and commercial overhead doors. The goal of the new assembly is to simplify the replacement of worn and damaged astragals.

The press-in astragal allows for a smooth, effortless, and secure installation, ending the struggle of pulling and feeding from

Experiencing problems with replacing old & damaged astragals?

the side with the track in the way. No special tools or lubes are needed. Instead, a technician will simply press in a new FRP astragal to a new URP universal slotted retainer.

The new URP universal slotted retainer series is available in widths of 1-3/8", 1-3/4", and 2"; and lengths of 4'1" and 6'1". The new FRP press-in astragal series is available in widths of 3-3/4", 4-3/4", and 6".

The assembly also offers companies the opportunity to repackage for reselling to the DIY market. [www.advancedplastic.com](http://www.advancedplastic.com) ■

## Amber Controls announces new Fork Lift Truck transmitter

In April, Amber Controls released its Model 4244 Fork Lift Truck mounting transmitter, featuring 433.92

MHz frequency with secure rolling code transmissions and a lithium battery with a life of over 10 years. The transmitter can be mounted on

the truck fascia panel or the engine cover using the TEK screws provided.

The 4-button transmitter can open four or more doors at one site. For easy reference, each door can be painted to match the transmitter button color. All doors should be set to auto-close with photo-eye safety control so pressing a wrong button will not cause another door to close. The case is Nima 4X weatherproof with an operating temperature range of -20 to +60 degrees Celsius.

The Fork Lift Truck transmitter operates in conjunction with Amber Controls' Model 4224 four-channel receiver.

## CornellCookson adds two new finish upgrades

In April, CornellCookson introduced Galvanex Ultra and SpectraShield Ultra finishes, which serve as a protective topcoat for their Galvanex and SpectraShield finishes.

The new finish upgrades are polyester-based, textured, and feature water-resistant clear coats that increase the curtain's resistance to corrosion and help prevent deterioration. Both Galvanex Ultra and SpectraShield Ultra improve durability against normal abrasion and scratching as the door opens and closes — increasing the door's longevity and aesthetic.

## Haas unveils new Graywood option

In April, Haas Door launched a new woodgrain color — Graywood. The deep gray is now available for residential and commercial models in their American Tradition, Insulated Steel 2000, 700, and 600 Series.

On-trend gray tones like Graywood complement warm and cool exterior materials and finishes, including brick, stone, wood, slate, and a variety of paint colors. The unidirectional woodgrain pattern of Graywood adds a modern feeling to a classic gray with a warm woodlike element. The hue is consistent across the door, yet the woodgrain pattern is still clearly visible. [www.haasdoor.com](http://www.haasdoor.com) ■

## Miller Edge introduces RBand for the door industry

In January, Miller Edge launched the latest addition to their monitored wireless system product offerings, expanding their RBand product arsenal. RBand for Doors grants dealers and installers in the door industry a new wireless system composed of the same advanced features and technology that have been proven reliable in the gate industry for years.

The RBand for Doors features several upgrades, including improved RF immunity through software upgrades, improved software allowing RBand units to self-assess and increase power output, and a shortened response timing.

## Action Industries introduces E-Z ZIP Push-In Bottom Seal

In February, Action Industries launched the E-Z ZIP One-Piece Push-In Bottom Seal. The patent-pending bottom seal eliminates the need for conventional retainers by offering a two-in-one solution. A rigid portion creates structural support while a flexible portion creates the seal. A push-in barb retainer design makes assembly and installation easy, while the compact box cuts down on shipping costs. [www.action-ind.com](http://www.action-ind.com) ■

### Clopay makes Black finish standard on select steel doors

In May, Clopay announced that Black is now available as a standard paint color on one- and two-layer 24-gauge Classic, Bridgeport, Gallery, and Modern Steel residential garage door models.

The steel has an embossed woodgrain surface texture, and the thermal reflective “cool paint technology” is used to reduce heat absorption from sun exposure.

Clopay also announced a 2” uniflex Black stop mold. The Black hollow and high heat stop mold is also still available. [www.clopaydoor.com](http://www.clopaydoor.com) ■

### Miller Edge announces RBand Grand Giveaway Sweepstakes

In April, Miller Edge launched a new giveaway sweepstakes designed to give back to their door and gate customers. From Apr. 1 to Sept. 20, 2022, qualified Miller Edge RB-P-K10 and RB-G-K10 systems will come with a unique six-digit code that can be used to enter their RBand Grand Giveaway. RB-P-K10 and RB-G-K10 systems installed during the giveaway period will only be eligible for entry.

A total of six winners will be randomly selected and awarded a check for \$1,000. To register your qualified systems and for giveaway rules, please visit [www.milleredge.com](http://www.milleredge.com) ■

### Amber Controls releases four-channel transmitter and receiver

In April, Amber Controls announced that the Model 4216 four-channel white fob transmitter with 433.92 MHz rolling code is available. The transmitter incorporates a sliding cover to protect the buttons, and a lithium battery, with an average life of over six years, is included.

The 4224 four-channel White Receiver is powered from a 24V or 12V door controller supply, operates on a 433.92 MHz rolling code frequency, and has memory for 30 address codes. Case-mounted buttons allow each channel to be tested without used a transmitter. An internal antenna is included. [www.amber-controls.com](http://www.amber-controls.com) ■

### Alpine Overhead Doors introduces Speed-Grille

In May, Alpine Overhead Doors added the Speed-Grille to its line of high speed door solutions. The new high-performance, heavy-duty rolling grille features a variable frequency operator, which provides increased speeds up to 24” up and 12” down with a soft start/stop element.

Speed-Grille also offers a springless design and is engineered and built to last for at least 300,000 cycles. Standard safety and entrapment features include light curtains and photo-eyes. Additional customizable options are available.

The Speed-Grille is ideal for any application requiring high speed and security with heavy duty specifications, including parking garages, high-security entranceways, municipal facilities, storefronts, malls, and shopping centers. [www.alpinedoors.com](http://www.alpinedoors.com) ■

## Amber Controls announces Wireless Photo-Eye Set

In April, Amber Controls released its Model 9044-PW set of through beam wireless photo-eyes, including the Infrared Receiver (prewired with 6-1/2' of cable) and the lithium battery-powered Infrared Transmitter with a six-year battery life.

The product saves installation time by eliminating the need to wire cable over tall commercial doors as required for standard through beam photo-eyes.

The Infrared Receiver is suitable for both 24V and 12V supplies, and the package comes with adjustable reach brackets, screws, and more. Additional features include a slide switchselectable, relay output control function, and 300 c/s two-wire pulse output to meet both UL325 and European fail-safe safety standards, and a relay output control function.

The transmitter includes a low battery beeper, which will start beeping after six years. The 9044 photo-eyes are available without the prewired receiver cable.

## CornellCookson offers Sloping Bottom Bar for Extreme grilles

In April, CornellCookson announced that its Sloping Bottom Bar is now offered on Extreme 300 Series grilles. With up to 1" of slope per 1' DBG, the Sloping Bottom Bar has double the sloping capability of a standard pitch plate.

The low-profile tubular design, combined with a grille that gradually increases in length, creates a highly finished appearance. The Sloping Bottom Bar allows Cornell's Extreme grilles to provide security for sloped openings without sacrificing aesthetics. [www.cornellcookson.com](http://www.cornellcookson.com) ■

## Clopay expands Bridgeport Steel door options

In May, Clopay expanded the Bridgeport Steel residential garage door line, adding one-layer, non-insulated and two-layer, 1-5/16" polystyrene insulated construction options.

Bridgeport Steel has a symmetrical recessed panel design with an embossed woodgrain surface texture reminiscent of traditional stile and rail-built wooden garage doors. Homeowners can choose a long or narrow panel style and customize it with optional windows and decorative hardware.

The doors come in five standard paint colors: White, Almond, Desert Tan, Sandtone, and Chocolate, as well as three premium finishes: Black, Ultra-Grain Walnut, and Ultra-Grain Slate.

The new Bridgeport Steel doors are offered in both 24-gauge and 25-gauge models. Certain height and width restrictions apply. Premium colors and WindCode reinforcement are only available on 24-gauge doors. [www.clopaydoor.com](http://www.clopaydoor.com) ■

## Guardian introduces new residential jackshaft GDO

In March, Guardian Access & Door Hardware launched the Model 928 residential jackshaft garage door opener. Model 928 features a powerful motor designed to open garage doors up 850 lbs., 14" high, and up to 54" of high lift. Its space-saving design operates with or without a cable tension monitor, and an automatic garage door deadbolt lock secures the door on closing.

The 928 includes built-in motion-activated LED lighting (bright enough to illuminate an entire garage, providing added security), two automatic lock ports, a hardened steel collar to reduce the chance of motor/torsion shaft slippage, and a 9' clutch release rope. Like every Guardian operator, this new model is directly compatible with any version of HomeLink.

### DoorKing releases new Secure readers and cards

In April, DoorKing released the new ProxPlus line of card readers, featuring a higher degree of security than standard 125 KHz proximity card reader systems. Card clone products, available on the internet, can quickly and easily duplicate 125 KHz cards; to help address this issue, DoorKing launched the ProxPlus Secure line.

ProxPlus Secure readers use 13.5 MHz technology, and DoorKing adds encryption to the cards so that the card can only be read by a ProxPlus Secure reader, preventing unauthorized duplication of the access card. [www.doorking.com](http://www.doorking.com) ■

### EMX releases CellOpener-365

In March, EMX launched the Cell-Opener-365, a new GSM-activated access control solution. The CellOpener-365 allows users to open an automatic gate, barrier, or overhead door using a mobile phone. The device also has all of the features of a 365-day timer, making it easy to set specific open or close times for any device that utilizes a simple switch input.

All programming is done via SMS text message from anywhere. Since the CellOpener-365 uses GSM cellular service, all time and date settings happen automatically, which eliminates any required site visits to adjust a timer. It also includes a SIM card that can be activated by the users and works on any cellular network.

With the ability to add up to 1600 standard users and an additional 400 special users, the CellOpener-365 is designed for large, high traffic facilities. The CellOpener-365 is in stock and available through EMX's international distribution network.
