

## Clopay and LiftMaster partner to launch Extreme Series Door

In May, Clopay Corporation announced that it has partnered with LiftMaster to launch the Extreme Series Door, powered by LiftMaster. The high-performance, cost-efficient door system operates at a speed of 24" per second and has a life of 50,000 cycles. The Extreme Series Door will be offered by the Clopay, Cornell, and Cookson brands.

Offered as a system with LiftMaster's direct drive operator, the Clopay Extreme Series is ideal for fire stations, automotive dealerships, and service centers that need a high-speed door with a longer cycle life.

The Extreme Series portfolio includes a LiftMaster motor with myQ technology, and the door features upgraded hardware, additional high-performance components, and floor-mounted controllers that help set limits and reduce risk of injury. The new series is available in more than 20 models. [www.clopaydoor.com](http://www.clopaydoor.com) ■

## DoorBird A1121 IP access control device is now available

In June, Bird Home Automation launched the DoorBird A1121 IP access control device. The WiFi/PoE-enabled stand-alone solution provides secure access control to garages, side entrances, and service rooms. The new A1121 with keypad and RFID function is ideal for applications where no video intercom system is needed. It can also be paired with DoorBird's A1081 I/O Door Controller, which provides three additional relays per device.

Optional front panel finishes are offered, including brushed stainless steel, bronze, titanium, DB 703 pearled dark grey, and RAL 7016 anthracite gray. Additional features include weatherproof housing, surface or flush mount options, a configurable Wiegand interface, alarm system, and two relays allowing trigger actions at two doors or gates as well as HTTP(S) calls. ## Artisan unveils new stains for TimberLife doors

In August, Artisan Custom Doorworks introduced multiple new stains and colors for their TimberLife Accoya solid wood doors and TimberLife Tricoya lighter weight doors.

The new Tricoya faux stains include American Walnut, Ash, Burnt Oak, Colonial Mahogany, Dusty Mahogany, English Oak, Royal Cherry, and Traditional Mahogany.

The new Accoya faux stains include American Walnut, Army Green, Burnt Oak, Chesapeake, Cinnamon, Cocoa, Colonial, Dusty, and Traditional Mahogany, Driftwood, Early American, Fireside, Golden Oak, Java, Onyx, Rich Cherry, Rosewood, and Royal Cherry.

A factory-applied finish is offered on all TimberLife doors. Customers can choose from 12 Rhapsody standard stain colors, six Sansin standard stain colors, or a variety of custom paint colors. [www.artisandoorworks.com](http://www.artisandoorworks.com) ■

## Action Industries introduces E-Z ZIP Push-In Bottom Seal Kit

In August, Action Industries introduced the E-Z ZIP One-Piece Push-In Bottom Seal Kit. The patent-pending bottom seal eliminates the need for conventional retainers by offering a two-in-one solution. A rigid portion creates structural support while a flexible portion creates the seal. A push-in barb retainer design makes assembly and installation easy, while the compact box cuts down on shipping costs. [www.action-ind.com](http://www.action-ind.com) ■

## Hörmann rolls out new door line

In August, Hörmann announced the rollout of its new full-range polyurethane-insulated door line. The 4400 Clima Tech residential door and the 440U and 450U commercial doors are now being produced in the Hörmann facility in Sparta, Tenn., and are available across the U.S. and in Western Canada.

These door models are insulated with a controlled, proprietary-blend polyurethane that is only available from Hörmann. The 440U is 1-1/2" thick and the 450U is 2" thick, and each are constructed of two-sided steel sections, with proprietary 100% CFC-free polyurethane foam core insulation. Both models are suitable for commercial or more demanding residential applications.

The Clima Tech 400 is available for residential applications and has the same polyurethane-insulated blend. Additional customization options are offered for Clima Tech doors. [www.hoermann.com](http://www.hoermann.com) ■

## Raynor expands Woodtone options for StyleView and AlumaView Models

In October, Raynor announced the addition of 15 high-definition Elegant Finish Woodtone options to Raynor's StyleView and AlumaView door models. The upgraded wood appearance finish is offered on Raynor's 1-3/4", 2", and 3" residential and commercial aluminum models.

Elegant Finish Woodtones are backed by a five-year finish warranty. [www.raynor.com](http://www.raynor.com) ■

## Clopay Corporation introduces new Rolling Counter Door Package Unit

In August, Clopay Corporation introduced the Rolling Counter Door Package Unit, a prebuilt piece that simplifies installation. The stainless-steel unit easily slides into a predetermined wall opening and is ideal for stadiums, cafeterias, hospitality and educational facilities, and healthcare offices. The product is offered under the company's Cornell and Cookson brands.

The unit's small components eliminate trim buttons from the interior of the opening, streamline the appearance, and enable all operation options to fit into an existing wall opening without additional building modifications.

The unit requires minimal headroom and features guide grooves incorporated into the jamb design. Additional features include removable hood fasteners, minimal transitions and seams, and a reimagined weather-sealed bottom bar.

Optional curtain finish options include stainless steel ScreenGuard, Galvanex gray or tan, and over 180 SpectraShield powder-coat colors. [www.clopaydoor.com](http://www.clopaydoor.com) ■

## Raynor launches rolling steel DuraCoil product line

In March, Raynor launched their new DuraCoil HP for high performance rolling steel doors. The company expanded the size offerings to include doors up to 20' x 14' high.

Every DuraCoil high performance rolling steel door features a 300,000-cycle life. The ControlHoist direct drive operator has a soft start and stop feature, allowing for smooth open and close door operation. With operating speeds of up to 24" per second, there is less time for air exchange, offering increased energy efficiencies throughout the facility.

The DuraCoil HP is also springless, which eliminates the need for a counterbalance system, making it a low maintenance door ideal for the commercial sector. [www.raynor.com](http://www.raynor.com) ■

## Clopay adds two new finish upgrades

In August, Clopay added two new finish upgrades for its Cornell and Cookson product brands: Galvanex Ultra and SpectraShield Ultra Powder Coat. The new upgrades provide a protective top layer for rolling security doors and are designed to help prevent deterioration and increase the curtain's protection against a corrosive environment.

Galvanex Ultra and SpectraShield Ultra are polyester-based, textured, and wear-resistant clear coat finishes. Galvanex Ultra is a dual-coat finish applied to steel curtains and is available in gray, tan, white, or brown. SpectraShield Ultra is an environmentally friendly, powder-coat finish for steel or aluminum and is available in more than 180 RAL colors and custom hues.

The new finishes feature a five-year warranty against fading, cracking, blistering, flaking, or peeling, and a two-year or 50,000-cycle warranty against normal abrasion and scratching. [www.cornellcookson.com](http://www.cornellcookson.com) ■

## Overhead Door Brand launches Universal Wireless Wall Console

In June, Overhead Door Brand launched the Universal Wireless Wall Console. The new console enables homeowners to control up to three openers from a variety of manufacturers on a single device. It's easy to set up and comes with a special "Jogger Button" that provides users with an up to 20-second delay to exit the garage safely.

Ideally suited for homeowners with multiple openers in their garage, the universal device is compatible with most major rolling and fixed code opener brands in the U.S. Customers can mix and match garage door opener and receiver brands on one device; each of the console's three "DOOR" buttons can be programmed individually.

The console also includes a highly visible LED lighting feature that provides a pulsing backlight, making the device easy to locate in dark spaces. The backlight's pulse rate can be changed to an alternate speed or turned off completely for maximum battery life. [www.overheaddoor.com](http://www.overheaddoor.com) ■

## Brinks Commercial highlights new Matte Black finishes

In July, Brinks Commercial announced its complete suite of commercial grade matte black door hardware. The new line gives architects, contractors, locksmiths, and DIYers a fresh, modern alternative to the silver-toned finishes that once dominated the market.

The Matte Black hardware is constructed with ultra-durable, powder-coated, chip-resistant finishes and is offered on a variety of Brinks Commercial products, such as keyed entry knobs, rim/panic exit device, door pull plates, doorstops, deadbolts, hinges, and more.

The collection will be available at Ace Hardware beginning in fall 2022. Additional Brinks Commercial finish options include Aluminum, Bronze, Satin Chrome, and Prime Coated. [www.buyhampton.com](http://www.buyhampton.com) ■
