

## Entrematic introduces two residential doors

In May, Entrematic introduced two new Amarr residential models. The Amarr Lincoln LI3138 and Hillcrest HI3138 1-3/8" steel doors are triple-layer, polystyrene-insulated, and offered with conventional hardware.

Both models have 27-gauge steel front and back panels and feature a new coextruded combined bottom seal with soft vinyl on the leading edge, mechanical fasteners, and T-slots that allow for installation of additional weatherseals.

The Lincoln LI3138 is available in short, long, flush, and ribbed panel designs. The Hillcrest HI3138 carriage house designs include bead board, long bead board, raised, and recessed panels.

Both Amarr doors are available in 12 colors and six glass options and offer various window inserts and decorative hardware options. [www.entrematic.us](http://www.entrematic.us) ■

## Overhead Door announces two new Wi-Fi-integrated openers

In April, Overhead Door introduced two new residential garage door openers with integrated OHD Anywhere Wi-Fi technology. The Legacy 650 (Model 1129) and Legacy 850 (Model 2129) openers are small, lightweight, and convenient, granting homeowners the ability to monitor and operate their garage doors from almost anywhere using a smart device.

The Legacy 650 and 850 each have an opening speed of up to 7" per second and are built with a 24V DC motor. The Legacy 650 is capable of operating doors up to 8' in height and up to 350 pounds. Legacy 850 can operate doors weighing up to 500 pounds.

Standard features include the CodeDodger access security system, easy programming, and the self-diagnostic Safe-T-Beam System. Both openers are compatible with HomeLink and Car2U in-vehicle wireless control systems and do not require an additional external repeater kit or compatible bridge for function.

## CornellCookson launches three new grille models

In June, CornellCookson introduced three new models for its SteelWeave Metal Mesh Grille: Aesthetic Reveal, Aesthetic Conceal, and Service Model.

The Aesthetic Reveal model fully displays the SteelWeave Metal Mesh Grille and is designed for high-end retail and hospitality spaces. The Aesthetic Conceal features a finished look intended to hide the perimeter of the grille and

includes an aluminum-finished guide and an externally mounted motor.

The Service Model features a tight weave designed to keep out small trespassers while allowing for airflow and ventilation. This model is ideal for trash rooms, storage spaces, and loading docks.

The SteelWeave Metal Mesh Grille offers two standard curtain designs (Lago and Tigris) and three special-order curtain designs. Optional security features include a locking mechanism, remote monitoring, and control via a central master panel.

## LiftMaster introduces RFID reader and tags

In June, LiftMaster announced its RFID Long-Range Readers (LMSC1000) and vehicle tags. The reader and tags work with LiftMaster CAPXL and CAP2D access control systems.

The non-transferable, dual-purpose Vehicle RFID Tags (LMUNTG) can be universally applied to a headlamp or windshield. A rearview mirror RFID Hangtag (LMHNTG), for guest passes, loaner vehicles, student/faculty parking, and employee access control, is also available.

All RFID tags work exclusively with the RFID Reader that is capable of reading vehicle tags from 20' to 30' away. [www.liftmaster.com](http://www.liftmaster.com) ■

## Overhead Door expands battery backup options

In July, Overhead Door announced that its Legacy 650 and 850 now offer a battery backup option. Now, the company's entire line of overhead doors is available with a battery backup option.

The battery backup enables an opener to operate the garage door at 3.5" per second and run up to 50 cycles in a 24-hour period after an initial power outage.

With several mounting options available, the battery backup unit is powered via a connector cable between the opener and the unit. The unit reaches full charge within 48 hours and has front-facing LEDs that indicate charge status.

The Legacy 920 offers a completed integrated battery backup, and the Legacy and Destiny openers include integrated OHD Anywhere technology. [www.overheaddoor.com](http://www.overheaddoor.com) ■

## Schweiss Doors unveils new hinge design

In July, Schweiss Doors introduced a bi-fold and hydraulic door hinge with grease zerks. The heavy-duty greaseable hinges with removable pins are now offered on every door.

The new hinge design allows bi-fold door users to grease their hinges from the underside of the doorframe without having to remove the top rubber weatherseal.

## Entrematic introduces D-6 high-performance door

In May, Entrematic announced that the Dynaco D-6 high-performance door is now available. The new D-6 features push/pull technology, opens and closes quietly and reliably, and travels up to 140" per second.

The drive system and additional door components have been upgraded for improved alignment and less wear and tear. The D-6 door offers maintenance-friendly components and movable service panels.

The D-6 Dynalogix 5 controller offers end users and service technicians a touchscreen interface to access information and diagnostics. The soft curtain door protects pedestrians, and the soft bottom edge technology incorporates a wireless fail-safe sensor that reverses the door if it comes in contact with people or product.

The D-6 door is available in Power and All-Weather models.

## Genie integrates Aladdin Connect

In May, The Genie Company expanded its Aladdin Connect technology and Wi-Fi capable system to its 2128 and 1128 builder-grade openers. Models 2128 and 1128, with belt or chain-drive rails, now have Genie's Aladdin Connect system built directly into the powerheads.

Aladdin Connect is compatible with Alexa and Google Assistant platforms and features time-based rules and virtual keys. The Aladdin Connect app increases homeowners' ability to monitor and control and to schedule door closures or grant door access.

Both door openers offer Aladdin Connect technology and a 24V motor that can lift doors up to 8' tall. The Model 2128 can lift doors up to 7" per second, and Model 1128 up to 6.5" per second. [www.geniecompany.com](http://www.geniecompany.com) ■

## Royal launches new ThermoStop colors

In April, Royal Building Products added slate and charcoal to its Royal Solar Reflective (RSR) ThermoStop Garage Door Stops.

The new ThermoStop colors are available in three distinct profiles and accommodate the growing contemporary and midcentury trends for builders, designers, and architects.

## CornellCookson expands fire-rated products

In May, CornellCookson added the AlarmGard Plus motor to its full line of fire-rated products, including hoistway smoke enclosure systems, full-size and counter-size rolling fire doors, and a variety of motors and manual equipment.

The AlarmGard Plus fail-safe, chassis-style motor operator includes an automatic reopen feature, adjustable time delay, tamper-proof cycle counters, an integrated fail-safe release device, and an internal, variable-rate centrifugal governor.

The operator is equipped with an auxiliary chain hoist and on-board battery backup that provides up to eight hours of battery life in the event of a power failure. If the door does close due to an alarm or extended power outage, the operator will automatically reset and reopen the door.

This operator may be retrofitted to existing fire doors of various manufacturers. [www.cornellcookson.com](http://www.cornellcookson.com) ■

## Torque Force unveils new hardware

In July, Torque Force, a division of Canimex, added new black hardware to its product line. The new powder-coated hardware is covered with a resistant powder coating that adds extra protection and saves time. The new hardware offers functionality and durability for garage doors.

## Haas Door expands impact glazing options

In May, Haas Door added impact glazing options to its American Tradition 900 Series. The garage doors are made of durable steel and now feature four polycarbonate impact window choices: clear, dark gray, bronze, and pebble.

American Tradition Series doors feature a thickness of 2" and CFC-free polyurethane insulation. Offered in single or double doors and with several solid designs or window options, American Tradition comes in 13 solid colors plus four woodgrain base options.

### Clopay adds new color

In July, Clopay introduced charcoal as a new standard paint color on select residential and commercial steel garage doors. The new color is available on the Classic, Modern Steel, and Gallery Collection premium series residential models and on Clopay's commercial Energy Series. [www.clopay.com](http://www.clopay.com) ■

### Wayne Dalton introduces finish and woodgrain options

In May, Wayne Dalton announced that its terra bronze finish and walnut and mission oak woodgrain options are now available on a variety of doors. Terra bronze is a medium-brown painted finish offered on Wayne Dalton's residential Classic Steel Models 8300 and 8500, Carriage House Steel Model 6600, and its commercial ThermoMark Models 5150 and 5200.

The walnut and mission oak woodgrain options are available on Classic Steel Models 8000, 8100, and 8200 and are applied in a unidirectional pattern. The two woodgrain colors are also available in a bi-directional pattern on select Model 8300 and 8500 panels. [www.wayne-dalton.com](http://www.wayne-dalton.com) ■

### Clopay receives Miami-Dade NOA

In May, Clopay received a Miami-Dade Notice of Acceptance (NOA) for its impact-resistant Reserve Wood Collection doors. Approved products include Reserve Wood Collection Custom Series, Wood Limited Edition Series, and Modern Series Wood overhead doors with built-in WindCode reinforcement and impact-resistant glazing. The NOA certifies that these products are approved for residential use in Miami-Dade in widths up to 9' and design pressure ratings up to +47/-55.

Select designs and sizes in Clopay's Reserve Wood Collection also have Florida Building Code product approvals in sizes from 9'2" up to 16'2" wide. Clopay has a total of 45 Miami-Dade NOAs. [www.clopay.com](http://www.clopay.com) ■
