

LiftMaster launches new access control system

In January, LiftMaster introduced its Connected Access Portal, High Capacity (CAPXL) with LiftMaster Cloud. This all-new access control system gives residential community managers a smart, expandable, cloud-based solution to control multiple entry points and manage several communities from a single dashboard.

The CAPXL helps dealers maximize efficiency with fewer callbacks and faster installation time while also letting them know if there are technical issues from anywhere. With remote programming and activity monitoring using LiftMaster Cloud, LiftMaster dealers and their customers can track and control access points and create alerts when an entry code is being overused or when a suspended user is trying to gain access.

Local database storage also allows residents to enter even if the internet is down, further preventing unplanned dealer callbacks. Installation is streamlined with easy step-by-step instructions, as the CAPXL uses Wi-Fi and wireless link to pair it with 2016 or later LiftMaster Gate Operator models. The wireless link also eliminates the need for trenching. www.liftmaster.com/accesscontrol ■

LiftMaster announces new wall-mount opener

In January, LiftMaster introduced its new 8500W DC battery-backup wall-mount Wi-Fi residential garage door opener.

The 8500W features built-in Wi-Fi, a MyQ remote LED light, the Automatic Garage Door Lock, a smart control panel, Homelink compatibility in select vehicles, a 3-button remote control, and backup battery. Its DC motor and wall-mounted position minimize noise and vibrations.

“The new LiftMaster 8500W is unlike any other garage door opener,” said John Villanueva, vice president and general manager for Residential Access Solutions. “It not only helps solve the garage storage issue by freeing the ceiling to optimize space, but it’s also perfect for anyone who wants the latest in smart features for their home.”

Engineered to reduce install time and service calls, the 8500W features

a user-friendly interface, built-in automatic guide, simplified wiring, and a hidden antenna. Its limit and force settings are programmed once during installation and automatically readjust.

Skylink displays Nova smart system at CES

At the CES 2018 show in January, Skylink debuted its all-new Nova system that can transform existing garage door openers into smart openers. The system uses the SkylinkNet iOS or Android app and can be retrofitted directly onto most garage door controllers.

The Nova meets UL 325 safety requirements, is compatible with the If This, Then That (IFTTT) platform and Alexa Voice Services, and is programmed as an LED light fixture. It can also detect the audible alarms from smoke and carbon monoxide detectors, automatically opening the garage door for added ventilation in case of an emergency.

Nova’s smart Wi-Fi connection protocol allows users to seamlessly connect to a home’s Wi-Fi network. Installation is easy, requiring minimal wiring. It will be available at www.skylinkhome.com this spring. www.skylinkhome.com ■

Raynor debuts 3" door with 24.54 R-value

In January, Raynor introduced the ThermaSeal TM300, a commercial foamed-in-place polyurethane door.

Its 3"-thick sections and exclusive Neufam technology offer excellent adhesion, exceptional strength, and an R-value of 24.54. Maximum width is 40', and the door can accommodate an aluminum full-view section.

The TM300 section will mate securely with Raynor’s TC300 door profile with the use of an interior-only adapter rail and with no spring or hardware modifications required.

Wayne Dalton launches new high-speed fabric door

In December, Wayne Dalton launched its Model 880 ADV-X, a high-speed fabric door with a flexible bottom and breakaway bottom bar that self-repair and minimize damage in case of accidental collisions.

The door opens up to 70" per second and includes a wireless monitored reversing edge. Its strutless design helps to decrease noise, and its patent-pending curtain lock allows for easy repair. Its high-cycle springless design requires less maintenance, and its variable frequency drive reduces sudden jolts from starting and stopping.

Available up to 12' x 12', the door is made of two lightweight layers of PVC-coated polyester with one layer of polyester weave. www.wayne-dalton.com ■

Entrematic introduces new commercial model

In February, Entrematic introduced the Amarr 2732 medium-duty 2" polystyrene-insulated steel door. Its 27-gauge exterior panels feature stucco embossment and shallow pencil grooves, while its 27-gauge interior panels are stucco embossed.

Available in door sizes up to 24'2" x 26'1", the 2732 has an R-value of 9.4 and a U-factor of 0.106. It is offered in true white, sandtone, commercial gray, and commercial brown standard colors and is also available in Amarr Color Zone. www.entrematic.us ■

Overhead Door announces woodgrain for aluminum models

In January, Overhead Door announced four new woodgrain finishes for its Modern Aluminum Model 521 garage door. The four new colors include knotty pine, cherry, cherry with flame, and dark walnut.

These woodgrain finishes supplement the nearly 200 powdercoat color options already available. Sizes range up to 26'2" x 20'1", and options include four types of specialty glass, four types of glass alternatives, and anodized finishes. www.overheaddoor.com ■

Garaga adds two new models

In February, Garaga added two new residential garage door models. One is the Princeton model for its Townships Collection, and the other is the Shaker XL model for its Standard+ Series.

The Princeton features a 30"-high top glass section and is available in nine different colors and 12 decorative window options. The Princeton is a 2-3/8"-thick steel door with polyurethane insulation (R-16) and PVC overlays and is offered in six designs and widths of 8' to 18'. The Townships Collection now includes three models: Princeton, Eastman Estate, and Cambridge.

The new Shaker XL is a 1-3/4"-thick steel door with a 40" x 15" embossment and is available in nine colors and 22 decorative thermopane-type windows. The Standard+ Series is now offered in 13 different door designs. www.garaga.com ■

Delden rebrands its steel trim collection as Deltrim

In December, Delden announced that it is rebranding its Steel Trim collection as Deltrim. The door collection is an expansion of Delden's "Your Home Your Design" custom-built garage doors.

In addition to the rebranding, Delden has added the CDC-1380 door section option. The availability of 24" sections provides for four-section 8' doors with larger custom-built windows. Deltrim R-values range from 6.48 to 9.05.

Deltrim doors on CDC-1380 sections come with a limited lifetime paint finish warranty and 5-year hardware warranty. The trim overlays are warranted against delamination for one year in the cedar overlays, three years for Smart Trim, and 10 years for the polyurethane overlay.

Lawrence Doors debuts auto-test system for fire doors

In January, Lawrence Doors introduced the FirePro Auto-Test System that verifies the alarm-activated automatic closing function of its auto-reset fire doors.

This wall-mount key-controlled switch is also compatible with the AR-C Auto-Reset Conversion to upgrade Easy-Reset fire door systems and can also be used to verify the auto-open function of

Lawrence Gateway Series egress doors and grilles. Scanning the QR code will take the user to complete operations and maintenance instructions.

Haas launches new specialty and decorative glass options

In January, Haas Door introduced a new series of decorative glass windows for its aluminum and steel garage doors and a new specialty glass option for most of its product lines.

The new Decorative Glass Collection features Prairieview, Emerald, and Modern Craft styles available in four different types of glass. These economical window designs increase curb appeal, complement whole-home window packages, add value to the home exterior, and provide varying levels of privacy. These tempered windows are offered in single pane and double-pane insulated.

Haas has also expanded its specialty glass offering. Along with clear on clear, insulated glass combinations include aqua on clear, rain on clear, clear on frosted, aqua on frosted, and rain on frosted. The least opaque combination is clear on clear, while the highest opaque rating comes with rain on frosted glass. www.haasdoor.com ■

Raynor offers new window option

In January, Raynor announced the availability of VersaView contemporary windows on the Aspen AP200 door. With VersaView, the customer can place windows in any location on the door.

The VersaView option increases the amount of light inside the garage while also improving the door's appearance.

Entrematic adds two new glass options

In February, Entrematic added frost and dark-tint glass options for Amarr residential steel garage doors. Both options provide an extra layer of privacy and light protection.

Frost and dark-tint single-pane glass options are available on Classica, Oak Summit, Hillcrest, Designer's Choice, Heritage, Stratford, Lincoln, and Olympus, but are not available on Carriage Court doors or as insulated or impact glass.

Frost

Dark Tint

Garaga adds chocolate walnut woodtone

In February, Garaga added chocolate walnut to its choice of colors. The new color is available in the Townships Collection and Standard+ Series doors.

Chocolate walnut replicates the mixture of shades found in real wood. The unidirectional ribbed “wood” surface simulates the look of a varnished wood door.

Townships Collection and Standard+ Series doors are now offered in 10 colors, including ice white, desert sand, claystone, moka brown, dark sand, charcoal, black, evergreen, and American walnut. www.garaga.com ■

Hörmann adds TimberLast finishes

In February, Hörmann added TimberLast Finish colors to its Gemini collection of open-backed steel residential doors. The new Gemini 2110 is now available in four distinct TimberLast stain colors: walnut, rosewood, medium oak, and golden oak.

The Gemini 2110 is available in traditional, ranch, country, cottage, and medley panels and with or without insulation. The Gemini Collection comes in nine standard colors and now includes TimberLast finish stain options. www.hormann.us ■

RAPIDO™ TWICE AS FAST

2X FASTER*

OPEN AND CLOSE YOUR DOOR TWICE AS FAST WITH A RAPIDO OPERATOR FROM MANARAS-OPERA.

The RAPIDO™ features a door speed up to 2 times faster than standard models available to the commercial and industrial door market.

The RAPIDO™ increases the longevity of the complete door system, designed to speed-up industrial standard lift sectional doors while smoothly managing soft-starts and soft-stops.

CHOOSING THE RAPIDO™ IS SIMPLE WHEN TIME AND ENERGY SAVINGS IS A MUST.

On-board control and monitoring of external entrapment protection devices, provide speed managing features and enhanced performance and reliability.

*The RAPIDO™ operator is up to 2X the speed of a standard jackshaft operator.

Entrematic adds black and charcoal gray

In February, Entrematic introduced a black color option for its Amarr Heritage garage doors. Heritage doors are offered in true white, almond, sandtone, dark brown, golden oak, mahogany, and walnut and are available in the Amarr Color Zone custom color program.

“Building on the popularity of black doors in other collections such as Amarr Classica and Amarr Olympus, we continue to receive requests for black garage doors in other collections,” said Vickie Lents, vice president of marketing.

Charcoal gray has also been added for the Amarr Classica, Lincoln, and Hillcrest collections. It is considered a “sophisticated alternative” to black. www.entrematic.us ■

Arm-R-Lite announces Rosalia

In January, Arm-R-Lite announced the Rosalia Model, which features a smooth exterior with horizontal grooves to line up with exterior building facades. Its smooth exterior contains no rough pebble or woodgrain texture.

Rosalia is available up to 24' wide and has a standard production lead time of 6 to 8 weeks. Custom colors and glazing options are also available. www.arm-r-lite.com ■

Action introduces three new product lines

In February, Action Industries announced three new product lines: horizontal and vertical track sets, torsion springs and cone sets, and decorative trim and hardware.

The new line of track sets are available in multiple sizes for one- and two-car doors. Action's torsion springs and cone sets come in multiple wire ranges and DASMA color-coding and stenciling.

The new decorative trim and hardware are available in ABS plastic, which adheres to garage doors with magnets or adhesive discs, and in metal with a rustic forged iron appearance that can be customized with unique finishes.

Telco adds sensor for hazardous locations

In February, Telco announced its SpaceMaster 9000 XP Series, a self-contained thru-beam sensor system certified for Class II Division 2 hazardous locations.

The sensor features a range in excess of 230', an IP69K water- and dust-tight rating, a 100,000-lux sunlight immunity, and a 3-year warranty. Extreme penetration power, long range, and high shock and vibration resistance make the 9000 XP Series ideally suited for doors and gates in harsh environments.

The 9000 Series receiver is available with a transistor or a solid-state relay output, while the transmitter features a test input for UL 325 compliance. www.telcosensors.com ■

Beckers announces BeckryTech coating

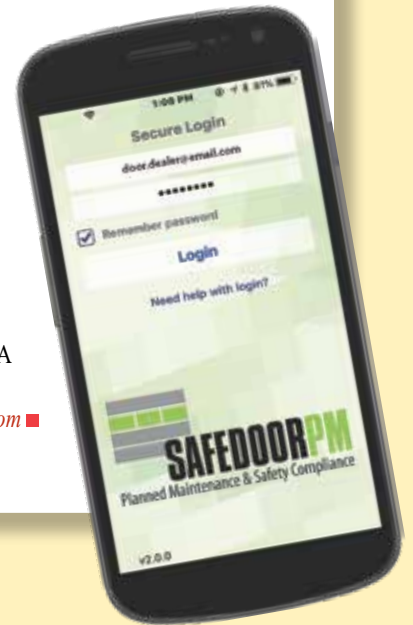

In January, Beckers announced its BeckryTech super-durable polyester coating, which is designed to last 40+ years with excellent color and gloss retention.

BeckryTech is based on a resin chemistry that is less reactive to UV light than the leading silicone-modified polyesters (SMP) on the market. It even resists the water “hazing” effect commonly found in coil-coated SMP products.

The coating meets AAMA 2604 in all color families and can meet the performance specifications of AAMA 2605, a common requirement for Hylar/Kynar systems. www.beckers-group.com ■

SafedoorPM announces Android mobile app

In February, SafedoorPM announced that its preventive maintenance (PM) program will soon include a mobile app for Android devices. The app will be launched and available at the IDA Expo on April 27. www.safedoorpm.com ■
