

Genie unveils two new wall-mount models

In December, The Genie Company introduced Models 6170 and 6070 wall-mount garage door openers. Both models hang to the side of the door and connect to the spring bar or tube, eliminating the bulky ceiling rail. The compact, rail-less design frees up space in the garage.

Each model includes a 24VDC motor and Genie's wireless wall station with flashing blue light and closing delay options. The automatic LED Bluetooth light eliminates wiring and can plug into any standard outlet within the line of sight of the opener.

The Internal Slack Cable Detection feature pulses the motor for the initial start and eliminates the need for other external detection devices.

Security features include the side location of the release handle, rolling access codes, and an automatic door lock. www.geniecompany.com ■

Haas Door announces Commercial 5000 Series

In December, Haas Door launched its Commercial 5000 Series garage doors. The 5200, 5700, and 5800 are made of heavy-duty 24-gauge corrosion-resistant aluminum sections with a weather-resistant Trinar paint finish. Wind-load and impact options are also available.

The 5800 and 5200 include air infiltration bulb seals that meet ASHRAE 90.1 requirements. The entire Commercial 5000 Series is designed for energy efficiency. Additional features include stucco embossment and a 35-year finish warranty.

Ranch and standard panels and three thickness options are available for all models. Clear glass is available in the 5800 Series. Specialty and decorative glass options are offered in the 5200 and 5700 Series. www.haasdoor.com ■

Wayne Dalton launches first-ever high-speed freezer door

In November, Wayne Dalton launched its new high-speed, high-performance interior freezer and cooler door, Model 887 ADV-Xtreme. Ideal for cold storage applications, the Model 887 offers features that help prevent temperature-dependent site issues, and the thermal barrier prevents conductive or convective cooling loss across the door.

Additional features include an insulated curtain with several color options, four guide seals, a double bottom, and an active recirculating heated guide. The patent-pending guide helps ensure the door maintains an appropriate temperature, which prevents condensation and contamination of products and also minimizes dirt collection.

Model 887 ADV-Xtreme has an opening speed of up to 80" per second and is equipped with a springless design. www.wayne-dalton.com ■

Overhead Door introduces springless security grille

In November, Overhead Door introduced the Model 671S EverServe Springless Security Grille. The new grille offers a 300,000-cycle door system with a limited warranty that is 15 times the standard of other rolling security grille products. It also comes with an upward coiling system.

Additional features include a continuous rod design, a high-strength curtain made from galvanized steel links, and a direct-drive integrated gear, motor, and brake assembly.

Model 671S is available in sizes up to 14'4" tall x 30' wide and offered in more than 200 powder-coat options. www.overheaddoor.com ■

Nice introduces Soon and Spy openers in North America

In January, Nice introduced the Soon and Spy residential garage door operators to the North American market. This marks the first time these operators are available in the U.S. and Canada.

The Soon sectional doors feature a compact design and battery back-up. The system is ideal for both residential and commercial applications.

The Spy is the first traveling motor for sectional up-and-over garage doors offered by Nice. The operator is installed without chains or other noisy mechanisms, and systems can be controlled from a wall-mounted unit or a Nice Era remote control.

Additional features include obstacle and device detection and entrapment avoidance systems.

Wayne Dalton updates Model 9510

In December, Wayne Dalton added the Ridgefield panel and multiple color options to its Model 9510 Designer Steel door. The new panel features recessed pinstripes and several premium paint finishes, including desert tan, terra bronze, gray, and black.

The Ridgefield is pinch-resistant and features Wayne Dalton's TorqueMaster Plus counterbalance system. Model 9510 doors come with foamed-in-place polyurethane insulation.

The doors are also available in standard white, almond, sandstone, and brown, or they can be customized with the Wayne Dalton TruChoice Color System. www.wayne-dalton.com ■

Clopay redesigns full-view doors

In January, Clopay updated its full-view aluminum doors with a new frame design and additional enhancements. The updated residential Avante AX and commercial Model 904 doors feature a new flat-faced, squared-off edge profile design and include an integrated bulb seal designed to keep out air and water. In addition, the reinforcing fin has been eliminated on door sizes that are 12' or less.

Existing color and glass options are available for both new models. Clopay will phase out the original Avante and Models 902 and 903 doors and replacement sections over the next two years. www.clopaydoor.com ■

Amarr full-view doors meet air infiltration requirements

In December, Entrematic announced its Amarr heavy-duty commercial and residential aluminum garage doors had been updated to meet Air Infiltration (AI) compliance requirements for ASHRAE 90.1, IECC, and California Title 24 (when installed with the Amarr AI L-Type Top Seal and AI Reverse Angle Jamb Seal).

Updates to the Amarr 3552 and Amarr Vista VII1000 aluminum full-view doors include an integrated retaining slot and flexible Santoprene bulb seal to the leading edge of the intermediate bottom rail. The size, shape, and appearance of the rail is otherwise unchanged, making it compatible with existing door sections. www.entrematic.us ■

CornellCookson launches Exam Room Counter Door

In December, CornellCookson announced that the Exam Room Counter Door is available. The new product is designed to transform a standard exam or emergency care room into a behavioral health room.

The door deploys with the press of a button, securing medical equipment, cabinetry, and other ligature points. This feature helps create a safe environment for behavioral health patients and saves healthcare providers money and resources.

The Exam Room Counter Door meets the ASHRAE/Facility Guidelines Institute (FGI) recommendations. www.cornellcookson.com ■

Clopay introduces plantation shutter-style doors

In November, Clopay added five louver-style door options to its Canyon Ridge Collection Limited Edition Series doors.

The low-maintenance faux wood overlay doors are made from a moisture-resistant composite, feature overlapping 3" horizontal slats, and are adhered to a three-layer steel door with a 2"-thick polyurethane-insulated foam core.

The plantation shutter-style doors come in several panel configurations and color options and are available with Mahogany woodgrain composite overlays in seven finishes, including black. Built-in WindCode is also available. www.clopaydoor.com ■

Wayne Dalton unveils high-cycle springless grille

In November, Wayne Dalton launched the Model 600 HC, a high-cycle rolling grille with a cycle life guaranteed to last 15 times longer than its standard grill.

The 600 HC offers a springless barrel design that eliminates the need for a counterbalance system. Additional features include a floor-level controller with a built-in, non-resettable cycle counter. The high-cycle motor also includes a built-in braking device and features a direct drive heavy-duty gearbox.

Model 600 HC is offered in steel, aluminum, or stainless steel, and comes in steel, clear anodized, or stainless steel finishes and 200 RAL powder-coat options.

LiftMaster enhances myQ-connected ecosystem

In January, LiftMaster expanded its myQ-connected ecosystem to include smart cameras and locks. The enhanced lineup was unveiled at CES 2020 in Las Vegas, Nev.

New products include LiftMaster Smart Cameras, such as the Wi-Fi garage door opener with integrated 85503 camera, and Yale/LiftMaster Smart Locks, including the Smart Touchscreen Deadbolt and Smart Keypad Lever.

LiftMaster myQ-connected smart garage openers work with Key by Amazon In-Garage Delivery and provide Amazon Prime members a place to deliver packages. www.liftmaster.com ■

Hampton Products unveils smart video-connected product line

In January, Hampton Products introduced its new line of connected video doorbells and garage door openers at CES 2020 in Las Vegas. This line of smart products is connected and controlled by the Array by Hampton app.

The new Array Video Doorbell connects to the homeowner's Wi-Fi and provides porch visibility and two-way voice capability. Additional features include IP65 weather resistance, a compact frame, a "no fisheye"

view, a rechargeable battery, infrared night vision, and a customizable indoor chime.

The Array Garage Door Opener offers location-based automation and door notification. Users can add geofencing capabilities to enable users to open and close garage doors based on vehicle position and to remotely monitor and control garage doors from anywhere. www.hamptonproducts.com ■

Nice/HySecurity introduces SmartCNX Controller

In January, Nice/HySecurity announced its new SwingSmart and SlideSmart CNX operators, both with a full-featured smartphone installation app. The SmartCNX controller includes a familiar user interface and offers five programmable inputs for access control devices, four slots for HySecurity Hy5B vehicle detectors, and a Nice BlueBUS port for sensors and accessories.

The smartphone installer app connects wirelessly to the operator, and the integrated HyNet technology enables users to remotely monitor and manage their gates from anywhere with an internet connection.

The CNX operators use brushless DC motors and direct-drive gearing, offering more power at lower speeds. www.hysecurity.com ■

Raynor expands TC series

In September, Raynor introduced the TC224 to its TC commercial sectional doors. The new door features a 24-gauge exterior, compared to the 26-gauge exterior currently available for the TC200. This polystyrene sectional door is ideal for dock or warehouse installations.

The TC224 is available in white, brown, or any ColorWave post paint colors.

www.raynor.com ■

CornellCookson updates EntryDefender

In December, CornellCookson announced that its EntryDefender is the only American-made rolling steel door that meets stringent U.S. Department of State standards for prevention of forced entry and ballistic resistance in structural systems.

The new door is designed to protect government buildings and other sensitive buildings from mob-style attacks for up to 60 minutes. The EntryDefender's steel curtain features interlocking slats that compress when in the closed position, reducing potential pry points. This door also allows architects, designers, and other specifiers the flexibility to incorporate large openings without compromising security and life safety. www.cornellcookson.com ■

Overhead Door launches Microgroove panel and metallic colors

In September, Overhead Door added the Thermacore Model 5740, featuring a Microgroove panel design with profiled wave structure and horizontal grooves.

The new modern panel comes in a flush design and is available in three metallic colors, including black frost, silver, and dark bronze. Model 5740's narrow aluminum windows are available in several customizable placement and tint options.

The new panel design is constructed with foamed-in-place, CFC-free polyurethane insulation sandwiched between two layers of corrosion-resistant steel. www.overheaddoor.com ■

Hy-Lite introduces Barn-Lite sliding doors

In July, Hy-Lite introduced its Barn-Lite sliding doors for home and commercial locations. Barn-Lite doors measure 38" x 83" and are available in wave and glacier acrylic blocks. Each block is 9" x 9" with a depth of 1-1/2". Architectural-grade vinyl frames are available in both white and bronze. The Barn-Lite doors are supported by durable steel hardware overhead in a black satin color.

www.hylite.com ■

Safe-Way Doors adds glass options

In January, Safe-Way Doors added 12 glass options to its Ventana Series of garage doors. The new glass offerings offer more contemporary and industrial designs and are available for the company's residential and commercial doors. www.safewaydoor.com ■

Raynor extends ThermoSeal operator line

In August, Raynor introduced TM320, its latest commercial foamed-in-place-polyurethane door. The TM320 sectional door features a heavy-duty 20-gauge exterior, 3"-thick sections, and Raynor NeuFoam technology.

www.raynor.com ■

Haas Door adds new glazing options

In December, Haas Door added four new impact-resistant glazing options to its Commercial Aluminum 320 Series. The CA320i Series is now available in clear, bronze, dark gray, and pebble. The new glazing options are ideal for states experiencing high winds, such as Florida and Texas.

The CA320i Series doors offer a straight-line look, heavy-duty frame, and expanded size options. The heavy-grade aluminum garage doors feature tongue-and-groove section joints with bulb seals for energy efficiency.

The CA320i doors come in four anodized and 10 painted frame colors, 14 woodgrain colors, and custom-matched colors and powder-coating are available. Glass doors in over 30 options, including obscuring glass and color tints selections, are also offered. www.haasdoor.com ■

Raynor receives Florida impact rating approval

In June, Raynor announced that it has received additional Florida impact rating approval (FL21471) for its Aspen residential doors. The approval applies to impact- and non-impact-rated models with vertical rows of glass up to 16' 0" (loads vary based on width) and fully glazed models with impact glass up to 9' 0" and design loads up to 60.0/-65.0. The full list of Raynor's wind-load-approved doors is at www.floridabuilding.org ■

Clopay announces black option for Canyon Ridge Collection

In November, Clopay added black as a standard paint color on its Canyon Ridge Collection Limited Edition Series and Canyon Ridge Modern Series garage doors.

The Canyon Ridge doors are constructed from a low-maintenance, moisture-resistant composite, and the material is molded from actual wood pieces. They are available in carriage house and modern designs.

Black is only available on the Mahogany overlay designs and is an option on the Clopay's Door Imagination System. www.clopaydoor.com ■

Raynor unveils two door options

In July, Raynor expanded its Morton Doors program by introducing two new Aspen models to its residential line and the M200C option with 2"-thick doors to its commercial line. Additional colors and panel options are designed to complement all Morton buildings.

www.raynor.com ■

Telco introduces new light curtain

In December, Telco Sensors introduced the Sensors SpaceGuard SG 13. The new light curtain system provides obstruction detection for commercial and industrial overhead doors.

The SG 13 generates a grid of up to 56 parallel infrared beams and protects door openings up to a height of 8.2' with a range of 60'. It is waterproof, offers 100,000 lux light immunity, and is suitable for installations exposed to weather, sunlight, and washdown areas.

Three compact profile designs are available for most doors. Additional features include automatic sensitivity adjustment, a test input, and Dynamic Sequential Blanking, which provides protection in the travel path of the door.

www.telcosensors.com ■

Raynor adds Driftwood woodtone

In September, Raynor added Driftwood to its Distinct Finish Woodtone options. The Driftwood finish features a dual-direction woodtone that simulates the look of authentic wood on a steel door base. Oak woodgrain patterns run between the embossed panels and rails to create a woodgrain appearance.
