

Cornell announces SteelWeave grille

In May, Cornell announced its new SteelWeave Metal Mesh Grille that is ideal for retail applications requiring an aesthetically pleasing grille. It can also be used as a room or space divider.

The grille features a type 316 stainless steel curtain, available in two standard and three special-order curtain designs. It can be etched to display a logo or image and comes with a tube motor or the MG, SG, or EverGard operator. It is designed for daily use and 50,000 lifetime cycles. www.cornellcookson.com ■

Chamberlain announces new in-dash innovations

In April, Chamberlain Automotive Connectivity Solutions, a business unit of Chamberlain Group, announced new enhanced smart garage door control from the dashboard of a vehicle for Alpine and EVE customers who have MyQ-enabled residential garage door openers.

MyQ is the first garage door control app to integrate into the EVE, enabling an in-dash touchscreen experience for owners of Tesla Model S and Model X. A user can

check the status of and operate their garage door from anywhere within their vehicle, and they can also manage smart home lighting.

Tesla owners can also be prompted to open their garage doors with a single

in-dash touch when their vehicles enter a predetermined “geofenced” area. All of this is delivered through the EVEConnect premium membership and MyQ subscription.

The MyQ features are controlled on select Alpine navigation systems via the Alpine Connect app. There is a subscription fee of \$1 per month or \$10 per year to link the MyQ app to Alpine Connect. www.chamberlaingroup.com ■

Dynaco launches new controller for high-speed doors

In February, Entrematic released Dynalogix 5, an “industry-changing” door controller that provides a new way of interacting with Dynaco high-performance doors, optimizing door cycle times to reduce energy consumption.

At the start of a door opening cycle, the Dynalogix 5 accelerates the drive to maximum speed quicker than any other door controller. For example, on the Dynaco D-313, it goes from 0 to 120 inches per second almost 30 percent faster than other controllers. Conversely, it needs less time to come to a stop at the end of an open or close cycle. By reducing these ramp times, the door spends more time at its maximum speed, which shortens the cycle time.

The Dynalogix 5 also works with various sensors to minimize the door open time, ideal for minimizing the loss of heated or cooled air. When the Auto-Close time is set to a minimum, the door will stay open just until its photo-eye sensors indicate that the threshold is cleared. Its full-color screen can display a variety of information to aid technicians during installation or servicing, and for users, it can show a countdown warning when the door is closing.

It is currently available in North America as an upgrade option on the Dynaco D-313, with availability set to expand to more doors throughout 2018.

C.H.I. introduces new Stamped Shaker door

In March, C.H.I. Overhead Doors announced the release of the new Stamped Shaker garage door. Stamped Shaker garage doors are available in Accents Woodtones (walnut and driftwood), Painted Woodtones (classic woodgrain and modern woodgrain), and seven standard door colors (white, almond, sandstone, desert tan, brown, bronze, and black). www.chiohd.com ■

Guardian introduces Smart Control Kit

At IDAExpo 2018 in April, Guardian Access & Door Hardware demonstrated its new model V2 Smart Door Control Kit that enables a garage door opener to be controlled by a smartphone.

The V2 is compatible with Amazon Skills and offers free IFTTT integration. The Wi-Fi-enabled kit allows the homeowner to monitor and control door activity and receive notifications on door Notifications and user permissions set using the beam app.

A wireless sensor mounts on garage door, and the controller be mounted on or near the garage opener. The kit controls one door be retrofitted to most garage door

Arm-R-Lite launches Arm-R-Blind

In May, Arm-R-Lite launched Arm-R-Blind glass units that seal blinds within insulated dual-pane glass. Instead of using pull cords, the blinds are operated with a manual slide that is toggle-mounted to each glass unit.

Arm-R-Blind is ideal for homes, hospitals, schools, and any application needing quick privacy. The blind shades are available in white, black, light gray, dark gray, tan, and sandy beige. The units are available with low-E for better thermal performance.

Wayne Dalton adds springless high-cycle rolling doors

In May, Wayne Dalton introduced Models 800 HC and 800C HC high-cycle rolling service doors, offering a cycle life that is 25 times that of its standard rolling door—plus an accompanying three-year, 500,000-cycle warranty. Thanks to its springless barrel design, the new models do not require a counterbalance system, and doors can be serviced with universal components for fast and easy maintenance.

Key features include a floor-level controller with a built-in non-resettable cycle counter and a digital readout featuring a time delay and self-close timer. The high-cycle motor includes a built-in braking device and a direct-drive heavy-duty gearbox.

The doors are available in steel, aluminum, or stainless steel and in four standard polyester finishes (gray, beige, white, or brown), and can be customized in about 200 powdercoat colors. The door offers a maximum width of 20' and a maximum height of 20'. www.wayne-dalton.com ■

CornellCookson adds wind load counter door

In May, CornellCookson announced its new Wind Load Counter Door, built to withstand wind load requirements of up to 40 PSF and impact ratings of up to 50 PSF. Compatible with steel, masonry, and CMU wall constructions, the door system's compact guide construction enables reduced clearances for sideroom and headroom for improved aesthetics.

It's available not only in a counter height but also in full height, with a maximum width of 14' and height of 10' and with a maximum total size of 140 sq. ft.

Entrematic introduces new commercial door

In May, Entrematic announced the Amarr 2747, a 1-5/8" polyurethane-insulated sectional door, compatible for use with 1-5/8"

doors produced by other manufacturers.

The door's triple-layer construction features a 27-gauge steel exterior, polyurethane insulation, and another layer of steel with an R-value rating of 15.1. It comes in true white, sandtone, commercial gray, commercial brown,

and the Amarr Color Zone. www.entrematic.us ■

Clopay adds slate finish

In May, Clopay announced that its new slate faux woodgrain finish option is now available on its Canyon Ridge, Gallery, and Modern Steel garage door collections.

Slate, a medium-gray hue with undertones of black and khaki, emulates the variation of light and dark shades found in reclaimed wood. As window, siding, and door manufacturers expand their color palettes to include black and charcoal, Clopay's multi-dimensional slate finish can appear rustic or modern, depending on the grain pattern and door style. www.clopaydoor.com ■

Overhead Door expands OHD Anywhere

In April, Overhead Door announced that it has fully integrated OHD Anywhere into its Legacy 920 garage door openers, allowing homeowners to monitor and control their garage door openers from anywhere using an Apple iPhone or Android phone or device.

"OHD Anywhere can be installed with any compatible garage door opener, but this is the first time the controller and sensor have been fully integrated into a garage door opener, making it much easier to program," said Heather Meiner, brand manager.

Legacy 920 openers include battery backup compatibility and give homeowners the option to choose between a chain- or belt-drive unit. Legacy 920 Models 7120H and 7120H-B are compatible with all current and previous versions of HomeLink and Car2U systems. www.overheaddoor.com ■

Haas adds specialty glass styles

In April, Haas Door expanded its specialty glass offering of insulated and non-insulated tempered glass for commercial and residential garage doors in all of the company's product lines except for the commercial 800 Series.

Insulated glass combinations are now available in all aluminum and steel product lines, including light gray/clear, dark gray/clear, bronze/clear, dark gray/dark gray, light gray/frost, dark gray/frost, and bronze/frost. Single-pane tempered glass is now available in light gray, dark gray, bronze, Plexiglas, clear Lexan/polycarbonate, and obscure.

All aluminum full-view products are available with single-pane glass options of frosted safety laminate, wire, clear safety laminate, and reflective bronze glass. www.haasdoor.com ■

Safe-Way Door adds black and gray

In May, Safe-Way Door announced that both its Ambient and Regency Series garage doors are now available in black and gray. In April, the company added gray as a color option for Safe-Way's Choice and Deluxe series of garage doors. The new colors respond to consumer color demands in the residential homebuilding market. www.safewaydoor.com ■

Rytec showcases Pre-Wired Spiral Premium Package

In May, Rytec announced its new Pre-Wired Spiral Premium Package, featuring factory-certified electrical circuitry in a preassembled high-performance door.

All Pre-Wired Spiral Premium Package doors feature out-of-the-box functionality and a three-year electrical warranty. The option allows reduced installation time and provides greater value and aesthetic appeal. In addition, an Advanced Light Curtain Safety System is now standard.

Re-Source announces new products

In May, Re-Source announced the addition of three new products to its line.

The Donkey Cone Spring Winding Tool makes it possible to adjust spring tension in cramped situations by converting the four holes on 1-3/4" or 2" standard cones to eight holes. This allows standard 18" winding bars to be used where that would otherwise be impossible.

The Green Hinge System virtually eliminates garage door noise and improves the door's energy efficiency by adjusting the door snugly against the exterior door seal. The system is available for residential and commercial doors up to seven sections.

The TorqueForce EZ Low Headroom three-piece kit allows a standard-lift door to operate in just 8" of headroom.

www.re-sourceind.com ■

Linear adds new 7" entry system

In April, Nortek Security & Control announced the addition of the new 7" e3 Entry System to the Linear line of access control and telephone entry solutions. Equipped with a larger touchscreen display and a keypad, the new browser-based system simplifies installation and the end-user experience.

The weatherproof display is easy to read in any light and weather, and its stainless-steel keypad features recessed, illuminated blue keys. Equipped with a motion sensor, ambient light sensor, and optional HD IP camera, the new offering includes a built-in postal lock and three-point locking mechanism for added security.

Entrematic improves insulated doors

In May, Entrematic announced improvements for its Amarr 2741 (1-3/8") and 2742 and 2042 (2") polyurethane-insulated commercial garage doors.

The tongue-and-groove section joint seal has been improved by moving the bulb seal from the middle of the section to the front of the section, enhancing its performance against air and water infiltration. In addition, the interior profile is being replaced on all models with a pencil groove profile that is similar to the exterior profile. www.entrematic.us ■

MORE
THAN JUST
GARAGE
DOORS

YOUR PARTNER FOR SUCCESS

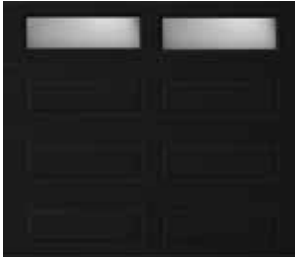

PERSONAL SERVICE. INDUSTRY KNOWLEDGE. EXPERIENCED ADVICE.

As a small business ourselves, we know and understand the small business challenges you face each day. From growing staff, to launching a new product, to balancing the books, we've walked in your shoes and we're here to help. Yes, we've been manufacturing quality-built residential & commercial garage doors for over 50 years, but even more importantly, North Central Door is the business partner you can count on.

Delden adds new options

In April, Delden announced the availability of a new black color option for the Delden Prestige residential polystyrene-insulated models and Delden Delcraft 200. The company also announced that frost and dark tint single-pane glass have been added as upcharge options for all Delden residential steel sectional door models.

In May, Delden added Lifestyle Screens to its full product offering, which includes models from Amarr, Haas, C.H.I. Rolling Steel, Trac-Rite, Rotary, Goff's, Fimbel ADS, Clopay, TNR, Pioneer, and LiftMaster. The company website's visualization tools have been updated with these new options and additions.
