

C.H.I. introduces Sterling Doors with Infinity Glass

In September, C.H.I. Overhead Doors released Sterling Doors with Infinity Glass as the newest addition to its flush door family. This new contemporary door design features broken steel with no embossment.

Sterling Doors are available in eight standard colors and 28 custom colors. Infinity Glass sections are available with or without cutouts and can be used in any section configuration. www.chiohd.com ■

Delden adds new insulated commercial door

In October, Delden introduced the new CDC-2027 triple-layer, polystyrene-insulated steel door. The CDC-2027 provides a medium-duty option to Delden's 2" triple-layer polystyrene-insulated sectional doors, and it is ideal for International Energy Conservation Code (IECC) insulated doors.

Key features include 27-gauge exterior and interior panels featuring stucco embossment. The doors are available in several colors including true white, sandstone, commercial gray, commercial brown, and 600 additional Sherwin-Williams paint colors. Standard door sizes are offered up to 24'2" wide by 20'1" tall.

CornellCookson introduces StormDefender door

In November, CornellCookson announced StormDefender, a rolling steel door designed specifically for safe-room protection against tornadoes and hurricanes. The StormDefender door features Cornell's AlarmGard closing system, which provides fail-safe operation during extreme weather events and power outages.

Other features include heavy-duty slats with specialized wind locks, sound-deadening end locks, and a sleek design allowing undetectable embedment into precast concrete.

The StormDefender door is tested and certified to ICC 500-2014 and FEMA P-361 standards. The fire-rated version of this door meets UL 10B and UL 1784 standards.

Nortek launches BluePass ecosystem

In October, Nortek Security & Control launched the Linear BluePass credential management ecosystem. This new system simplifies credential management by combining smart device-based electronic credentials, the BluePass management cloud, and a Bluetooth proximity reader.

BluePass allows dealers to manage their customers' credentials or delegate authority to specific customers. It also gives end users the ability to use their Bluetooth-enabled smartphones as credentials for their existing access control systems, eliminating the need for fobs or cards. www.linearproaccess.com ■

CornellCookson launches SmokeShield Elevator

In September, CornellCookson announced the SmokeShield Elevator, a compact elevator hoistway closure that deploys upon notification by the fire alarm or local smoke detector. This new smoke control system is an ideal alternative to elevator lobbies, and it allows designers to pursue more spacious building designs.

“There are very few alternatives to traditional elevator lobbies,” said David Dawdy, fire and life safety product director. “So, when a product with a feature set like this comes along, it’s a major breakthrough.”

The SmokeShield Elevator features patented GuideLock technology that positively reseals after each cycle as it contains smoke to the affected floor.

Additional features include a curtain-mounted switch for reopening, an auto-open function, and a standard battery backup. The snap-together design can be concealed in wood, masonry, sheetrock, or other fascia materials.

This door complies with IBC 2003-2018 and the ICC-ES Report AC-77. It is listed for UL 1784, UL 325, and ASTM-E 864. www.cornellcookson.com ■

C.H.I. adds seven new Planks options

In December, C.H.I. Overhead Doors announced its Planks doors are now available in seven colors: white, almond, sandstone, brown, bronze, gray, and black. Previously, residential Planks doors were available only in Accents Woodtones.

Planks doors feature horizontal micro-grooved sections and are available in two construction types. Three window size options are offered, and custom window placement is available in every section. Wind-load options are also available. www.chiohd.com/planks ■

C.H.I. introduces Skyline doors

In December, C.H.I. Overhead Doors introduced the Skyline product family, which includes flush sections and custom design options.

C.H.I. Skyline doors are available in 24" sections and feature windows in short panel, long panel, or oversized versions. Custom window placement is offered in every section.

Skyline doors are available in eight standard colors and five Accents Woodtones including walnut, driftwood, mahogany, dark oak, and cedar. Wind-load options are also available.

Entrematic expands flush panel offering

In November, Entrematic introduced a flush panel option for the Amarr Olympus OL3200 polyurethane-insulated garage door. The new flush panel design is constructed with an R-value of 19.4 and features a woodgrain embossment with no horizontal shadow lines.

The new Olympus flush panel is currently available in true white. www.entrematic.us ■

BEA launches Eagle Eye sensors

In October, BEA Lasers announced its Eagle Eye through-beam laser sensors. A single package contains a through-beam photoelectric laser source and a receiver. This combination emitter/receiver package is ideal for detecting objects such as metal, glass, plastic, wood, and liquid.

Eagle Eye sensors are offered with a red laser and a dot optic. The laser is pulsed/modulated, which helps the receiver to distinguish the signal from extraneous light and achieve a long sensing range. The maximum sensing range between the emitter and the receiver is 20 meters. www.bealasers.com ■

Re-Source adds new Sensor Shield photo eye protectors

In October, Re-Source Industries announced its new Sensor Shield photo eye protectors. The steel shields protect residential photo eyes from misalignment and impact damage. Each Sensor Shield comes with foam inserts to stabilize the photo eyes and add protection.

The Sensor Shield is available in powder-coated white or black and is designed to fit all major operator photo eye brands. www.re-sourceind.com ■

Overhead Door expands high-speed collection

In November, Overhead Door introduced two high-speed metal doors: the RapidShield Model 998 and RapidView Model 999. The new doors are ideal for applications requiring a fast-acting door, such as parking garages, auto dealerships, manufacturing, warehouse, or distribution facilities. Both models operate at up to 80" per second and are engineered for over one million cycles.

The RapidShield model provides a solid, dual-walled aluminum curtain, and the RapidView model offers a full-view door featuring scratch-resistant polycarbonate panels for maximum visibility and light infiltration. All doors come with static and operational pressure ratings.

Customizable options are available, including 200 RAL powder-coat and scratch-resistant vision slats for the RapidShield. www.overheaddoor.com ■

Safe-Way introduces new door color

In November, Safe-Way Door announced that its Regency and Ambient Series garage doors are now available in driftwood. The new color is part of the Madera color palette and is the third new color introduced in 2018. www.safewaydoor.com ■

Action Industries expands its RodentBlock seals

In November, Action Industries added vertical-side seal kits, dock leveler hinge seal kits, and pull-chain seals to its line of RodentBlock pest-proof door seals.

The vertical side seal and dock leveler hinge seal kits feature patented Xcluder fill fabric, which provides a secure weather seal and barrier that is impenetrable to rodents and pests. The pull-chain seals prevent mice and rats from entering facilities through the pull-chain opening on dock levelers. These new pest-proof products are designed for locations that require reduced or eliminated chemical usage. www.action-ind.com ■

C.H.I. adds options to Stamped Shaker doors

In December, C.H.I. Overhead Doors added three new Accents Woodtones colors to its Stamped Shaker doors: mahogany, dark oak, and cedar. The new colors supplement the existing woodtone and standard colors.

Stamped Shaker doors feature clean, simple lines and a minimalist design. www.chiohd.com/shaker ■

Wayne Dalton adds springless high-cycle rolling doors

In May, Wayne Dalton introduced Models 800 HC and 800C HC high-cycle rolling service doors, offering a cycle life that is 25 times that of its standard rolling door—plus a three-year, 500,000-cycle warranty. Thanks to its springless barrel design,

the new models do not require a counterbalance system, and doors can be serviced with universal components for fast and easy maintenance.

Editor's note: In our summer issue, we ran this story with the wrong photo. The correct photo is above. We apologize for the error.

Entrematic expands color options

In November, Entrematic added three new color options to its Amarr 2741 polyurethane-insulated commercial doors. The Amarr 2741 doors are now available in sandtone, commercial gray, and commercial brown.

The Amarr 2741 is also available in traditional true white and will be included in the Amarr Color Zone program for custom colors.

C.H.I. upgrades Accents Woodtones

In December, C.H.I. Overhead Doors announced that Accents Woodtones have been upgraded to 3.0. These improvements offer enhanced color, advanced UV resistance, and additional durability.

C.H.I. Accents Woodtones 3.0 are available in walnut, driftwood, dark oak, mahogany, and cedar. The Accents Woodtones line is manufactured using full-color digital imaging, with insulated steel and realistic woodtone doors. Design options include Raised Panel, Stamped Carriage House, Stamped Shaker, Skyline, Flush Carriage House, and Planks. www.chiohd.com/accents ■
