

CornellCookson launches Wind-Master

In October, CornellCookson announced that its Wind-Master rolling doors are now available. Wind-Master doors offer an impressive static wind load and are designed to operate in high-speed winds and to protect occupants and contents from blow-out.

Key features include roller end locks/wind locks and a springless construction that eliminates resistance and provides assistance during high-speed winds.

Wind-Master doors are available in several powder coat finishes and custom graphics and come in service and insulated versions. www.cornellcookson.com ■

Raynor launches Eden Coast door option

In June, Raynor announced that its Eden Coast carriage house door is now available. The low-maintenance wood-look door features overlaying steel sections and environmentally friendly composite material. The overlays are impervious to moisture, mold, and mildew, and are insulated with Raynor's NeuFoam technology.

DoorKing introduces new operator cover options

In October, DoorKing introduced optional polypropylene (poly) covers for its 9050, 9100, and 9150 gate operators. Richard Sedivy, DoorKing's director of marketing, said that these poly covers allow radio frequency (RF) signals to easily penetrate through them for better RF

reception. "In many applications, the need of an external RF antenna is not required with the poly cover."

In addition, DoorKing will include a MicroPlus receiver and transmitter with any operators shipped with the poly cover.

Metal covers are also available for these operators.

Delden updates product line and adds new residential models

In October, Delden Garage Doors added the new Delvation Collection

and replaced its Vintage Plus residential line with Vintage. The line expansion included the addition of four new models: the Delvation 400 and 500 and the Vintage 400 and 500.

The Delvation 400 and Vintage 400 models are 2"-thick-doors with double-sided steel, polystyrene insulation, and 27-gauge exterior and interior steel skin. The new Delvation and Vintage 500 models are 1-3/8"-thick double-sided steel doors with polyurethane insulation.

The company also announced that several existing products have been transitioned, replaced, or renamed.

All new lines include standard ball bearing nylon rollers, 14-gauge on-door hardware, and high-cycle springs. www.deldenmfg.com ■

Genie announces Universal Remote

In August, the Genie Company launched the Universal Remote. This new accessory can be programmed to operate up to four garage door openers or gate receivers, replacing multiple remotes with one single device.

The small-sized Universal Remote comes with a visor clip and key ring loop. Additional features include built-in LED light, easy pre-programming control options, and a pairing feature that allows users to program it to existing garage door openers.

Overhead Door introduces RapidFreeze door

In September, Overhead Door launched the RapidFreeze 997, an interior fabric, high-speed freezer/cooler door with an insulated curtain and thermal barrier. The new door is built for locations with varying temperatures and offers interior and exterior layers of PVC-coated polyester designed to encapsulate a conductive and radiant insulation barrier.

The RapidFreeze 997 includes a recirculating heated guide that helps prevent condensation or freezing. Doors are available up to 12' x 18' and in red, blue, white, and gray. They also offer an opening speed of up to 80" per second and integrate with Overhead Door's RapidFlex line.

C.H.I. launches new commercial sectional door

In October, C.H.I. Overhead Doors released a new micro-grooved commercial sectional door, featuring a heavy duty 24-gauge face with thermally efficient polystyrene insulation.

In January 2020, this door will be available with static and impact-rated FBC wind load certifications. www.chiohd.com ■

Raynor announces TM200C door

In July, Raynor introduced its TM200C commercial door featuring foamed-in-place polyurethane. The TM200C is offered in 11 standard colors and is ideal for matching doors for commercial projects. www.raynor.com ■

Entrematic expands Amarr Heritage carriage house designs

In July, Entrematic introduced four carriage house designs for its Amarr Heritage collection. The new options include bead board, long bead board, recessed, and raised panels.

The Amarr Heritage collection features 2"-thick doors made of heavy-duty 24-gauge steel. The carriage house designs are offered in single, double, and triple-layer construction and are available in eight colors. www.entrematic.us ■

LiftMaster adds Dock Door Operator

In August, LiftMaster introduced the Light-Duty Dock Door Operator with integrated dock management system. The new operator features myQ Business Facility software that provides cloud-based access and dock management monitoring and control.

The operator includes an exclusive LMi5 interface device that can track truck arrivals, leveler activity, and real-time door status. Additional features include door lock capability, built-in battery backup, and a timer to close.

www.liftmaster.com ■

Overhead Door introduces new panel

In September, Overhead Door introduced the Thermacore Model 196 insulated steel door, featuring a new Microgroove panel design with profiled wave structure and horizontal grooves.

Model 196 is available in three metallic colors, including black frost, silver, and dark bronze, and has several custom window and tint options.

The new panel design is constructed with foamed-in-place CFC-free polyurethane insulation sandwiched between two layers of corrosion-resistant steel. www.overheaddoor.com ■

DoorKing expands transmitter offerings

In October, DoorKing added a new four-button transmitter to its MicroPlus transmitter line. MicroPlus transmitters are now offered in one-, two-, three-, and four-button options.

The MicroPlus coding and encryption algorithms are not shared with outside producers such as automobile manufacturers. This prevents the transmitter codes from being duplicated or copied and ensures that only the original intended transmitters will operate the gate system. It also makes MicroPlus remote controls ideal for high-security applications. www.doorking.com ■

Haas Door adds carbon black

In September, Haas Door added a new color: carbon black. Carbon black features a deep black tone with a light gloss finish and is ideal

for residential or commercial door projects.

Carbon black is available for the American Tradition 2000, 700, and 600 residential series and its commercial Insulated Steel 2000, 700, and 600 series. www.haasdoor.com ■

Entrematic updates Serco Master Control Panel

In August, Entrematic announced updates to its Serco Digital Master Control Panel. The newly integrated dock equipment control panel now offers a fully digital interface featuring a human machine interface (HMI) screen that allows users to operate dock equipment, including levelers, doors, and restraints.

Key features include large buttons, a graphic interface, color and shape LED communication light, on-board data and diagnostics, password access and override, time-at-dock timer, and network integration capability.

The Serco Digital Master Control Panel is available as a retrofit or new installation. www.sercoentrematic.com ■

Raynor adds Airman II opener

In May, Raynor revealed the new Airman II with Wi-Fi garage door opener.

Model 8155WRGD is designed “smart” and is equipped with a 1/2-HP AC motor.

www.raynor.com ■

Garaga introduces black overlay color

In October, Garaga expanded its overlay color options by adding black to its Townships Collection.

The Townships Collection includes 3 models: the Princeton, the Eastman Estate, and the Cambridge. All these steel doors are 2-3/8" thick, including the decorative PVC overlays, and they are R-16 polyurethane-injected. www.garaga.com ■

C.H.I. updates Full-View doors

In August, C.H.I. redesigned its Full-View Aluminum doors to support dealers. Upgrades include a new, stronger rail design with through-bolt construction, optional polystyrene-insulated rails, a drip edge, and an integrated bulb seal.

The new doors are available in clear anodized and 188 powder-coat colors and offered in standard or specialty glass. www.chiohd.com ■

Overhead Door expands woodgrain options

In September, Overhead Door added walnut and mission oak woodgrain options for its Traditional Steel Collection models: 170, 171, 175, 180, 181, and 185. Walnut is the darkest brown woodgrain available. Mission Oak is slightly lighter and has red and orange undertones. Both options feature an embossed unidirectional texture and a natural appearance and are available for standard, V5, and long panel designs. www.overheaddoor.com ■

CornellCookson introduces EntryDefender

In October, CornellCookson introduced the EntryDefender, a rolling steel door designed to protect against theft and forced entry attempts. It is the only door manufactured in the U.S. that meets U.S. Department of State standards for forced entry SD-STD-01.01 (Rev) and is ideal for high-security applications.

Key features include a steel curtain with interlocking slats and a smooth surface that reduces potential pry points. The reinforced bottom bar and discrete locking system resist lifting force.

Available in SpectraShield powder coating, AtmoShield textured powder coating, and CycleShield high-cycle powder coating. www.cornellcookson.com ■

Entrematic launches insulated glass options

In September, Entrematic added Insulated Frost and Insulated Dark Tint glass options to its Amarr residential triple-layer steel garage doors. Insulated glass options are now available to order.

www.entrematic.us ■

Raynor releases Sergeant II with Wi-Fi

In June, Raynor launched the Sergeant II operator with Wi-Fi. It is equipped with battery backup and complies with the new California battery backup legislation. Raynor now offers four compliant residential Wi-Fi models: Prodigy II, General II, Admiral II, and Sergeant II. www.raynor.com ■

Safe-Way Garage Doors adds new options

In October, Safe-Way Garage Doors added a Madera woodgrain and Oak and Rosewood color options to its Choice series.

The Bronze color, previously added to the Regency and Ambient lines, is also now available for its Choice series. Choice doors are available in nine colors, four panel designs, and 23 window options. www.safe-waydoor.com ■

Raynor adds new carriage house door

In May, Raynor added the Country Manor door to its Distinctions Series. The new door features a carriage house panel design and inlay boards adhered to the inside of the embossment to provide a more realistic carriage-house appearance. www.raynor.com ■

C.H.I. releases new Accents Woodtone

In September, C.H.I. Overhead Doors added Natural Oak to its line of Accents Woodtone door colors. This light oak woodtone displays a non-repeating woodgrain and is available in Raised Panel, Stamped Carriage House, Stamped Shaker, Planks, and Skyline flush designs. www.chiohd.com ■

Garaga introduces three new colors for R-12

In October, Garaga added charcoal, black, and chocolate walnut as new color options for its Acadia 138 R-12 polyurethane-injected door. There are eight new colors offered for this model, available to view on Garaga's online Design Centre. www.garaga.com ■

Raynor updates Aspen product line

In May, Raynor announced the addition of the recessed ranch smooth-panel design and two new color options to its Aspen Series of residential steel garage doors. Auburn and mocha woodtones are now available on select doors and feature a single-direction. www.raynor.com ■

Overhead Door releases Wireless Wall Console

In August, Overhead Door introduced its Wireless Wall Console. The new garage door accessory requires no wiring and offers a "Jogger Button" featuring a 10- to 30-second delay option and a blue backlight design. The console is compatible with most Overhead Door CodeDodger openers manufactured since 2013.

The accessory is not compatible with Legacy Models 1026 or 2026. www.overheaddoor.com ■

Entrematic adds new standard color

In September, Entrematic added a black color option to its Amarr Lincoln 1-3/8" triple-layer and 2" single-double- and triple-layer constructions. Black is available in all Hillcrest constructions and designs and in all panel designs for the Lincoln collection. The Flush panel design is only available in the Lincoln LI3138 and LI3000 models.

Updated literature and sample discs are available on the Amarr residential steel sample color ring and at local door centers. www.entrematic.us ■

C.H.I. launches woodtone doors

In August, C.H.I. Overhead Door launched Shoreline Accents Overlay doors. The new line offers the classic appearance of real wood doors without the maintenance.

Shoreline doors are available in walnut and driftwood Accents woodtones and come in 24 carriage house designs with multiple window, glass, and exterior hardware options. www.chiohd.com ■

LiftMaster bundles edge kit with slide gate operator

In October, LiftMaster added the LMWEKITU Wireless Edge Kit to the bundled accessories already

included with the CSL24UL 24VDC high-traffic commercial slide gate operator, such as the LMRRUL Monitored Retro-Reflective Photo Eye and S505AL Monitored Small Profile Resistive Edge.

Adding the LMWEKITU increases safety and expands the protection of the CSL24ULWK system up to eight entrapment zones. www.liftmaster.com ■
