Automatic Technology America launches new sheet door operator

At Expo, Automatic Technology America (ATA) introduced its new commercial sheet door operator—the Dominator EasyRoller. After supplying garage door operators worldwide for over 30 years, ATA found the Indianapolis show a perfect venue to promote its extensive line of garage door and gate operators to the U.S. market.

Dominator EasyRoller features a slim profile for low side room installation, a 600N DC motor, soft start and close, LED lighting, and an intelligent safety system. The new opener is also battery backup compatible and retrofittable for use on most sheet doors.

Also launched this year is the second generation of ATA's wireless

Auto-Lock. The enhanced Auto-Lock is quick to install, offers a battery life of 3 to 5 years, and can be fitted to either the left-hand or right-hand side of the track or directly to the face of the door. Auto-Lock is controlled by ATA's Smart Technology and is included in every box of the Dominator Advance or Dominator Elite Plus models. www.ata-america.com

OUR NEW ACCESS

2333
BASE STATION BOARD

New **900MHz Wireless** Kit for Long Distance Access

Now add access points just about anywhere.

Our new 900 MHz Wireless Expansion Kits let you add access points in those hard-to-wire places, eliminating costly labor, trenching and conduit runs. Simply add a base station to a DKS telephone entry system, and a remote station (up to 48 of them) to a DKS access device and the wireless connection is made seamlessly. We even have a repeater for those hard to reach remote sites, doubling the wireless range. Best of all, our wireless kits are designed with LoRa® technology offering longer ranges, low power consumption, and secure data transmission.

DoorKing unveils new wireless expansion

On the Fencetech side, the expansive DoorKing booth showcased the 900 MHz Wireless Expansion System. The 900 MHz system allows dealers to add access points easily and inexpensively from anywhere on a property.

The new system uses LoRa technology, which offers longer ranges, low power consumption, and secure data transmission. It also eliminates expensive and inconvenient trenching and conduit runs.

DoorKing also featured its 1830 Series telephone entry systems with new and improved 90 Series housings. The new housing has enhanced locking and weather sealing and provides easy internal installation of optional components, including a card reader, LCD heater, and TCP/IP adapters. Mounting options include wall mount, flush mount, and post mount.

Arrow Tru-Line emphasizes white glove service

Customer service was the focus at the Arrow Tru-Line (ATL) booth. Several ATL representatives were available to answer technical and product applications questions. ATL stresses a total solutions-based business model that emphasizes a culture of taking care of its customers now, not later. The company provides this white glove service to every customer. The white glove experience consists of dependable shipping and packaging, consistent lead times, and excellence from the top down.

In 2018, ATL was named Supplier of the Year by a leading garage door manufacturer.

HAVE A NEED FOR SPEED?

Model 889 ADV-X

Wayne Dalton's newest high speed doors are our most powerful yet with a springless barrel built for more than 1 million cycles and a preassembled headplate for easy installation. Model 888 ADV-X is built for durability and offers a dual-walled solid aluminum curtain capable of withstanding hurricane-force winds. Model 889 ADV-X is a full-view metal door with clear vision, scratch-resistant panels and is made for applications where aesthetics and visibility are a priority.

Learn more about our High Speed Doors at

Wayne Dalton unveils lower-profile header and new doors

Wayne Dalton's Model 885 ADV-Xtreme exterior high-speed rubber door took the spotlight at the company's Expo exhibit. This newly updated high-speed, high-performance rubber door offers all the features of the ADV-X line with a new lower-profile header that can fit in more applications.

Wayne Dalton also showcased the Model 7409 Harrington Carriage House doors. The new premium wood doors are built by Amish craftsmen and wood artisans and combine the convenience of modern sectional doors with the classic appearance of carriage style.

The all-glass and aluminum Model 8450 Luminous door was also introduced. The Luminous door is designed to flow between indoor and outdoor spaces and can be installed in a home as a garage door, as a bar patio door, or as a divider between offices. Built to order, these doors can be customized in five glass finish options and five structure finishes. www.wayne-dalton.com

Action Industries launches Dealer Program and 3-D printing

Action Industries introduced a new Dealer Advantage Program that gives garage door dealers access to thousands of parts from four strategically located distribution centers. Dealers who join the program receive tiered pricing discounts and can qualify to receive internet leads through their listings on the Action Industries Dealer Locator page.

The new service connects dealers to a dedicated account manager who can provide support and recommend the best-selling parts for a specific area. The Dealer Advantage Program also allows dealers to use Action Industries' custom design center, which is ideal for projects with unique requirements.

Action Industries' sister company, Torsion Source, recently added 3-D printing for OEM manufacturers as an additional new service. 3-D printing greatly speeds up the design cycle and manufacturing process. This engineering service also helps OEMs accelerate new product development and helps bring products to the market faster. www.action-ind.com

Service Spring announces two new offices and interactive tools

At Expo, Service Spring focused on customer service, highlighting two new office locations and additional resources now available for its dealers.

The Indianapolis show location was an ideal venue to highlight Service Spring's new Detroit, Mich., and Chicago, Ill., offices. Both offices were opened to better service customers by offering same-day will calls and extended product offerings for these populous U.S. markets.

In addition, Service Spring announced its reimagined product catalog and a redesigned Spring Engineering mobile app. The new interactive catalog features interactive QR codes that link directly to the Service Spring website. Visitors can now access detailed product images, 360-degree product views, download owner's manuals and sell sheets, and view current pricing.

The Spring Engineering app can be downloaded for free and is designed for Apple and Android devices. It offers an improved user experience with spring calculations that technicians have learned to know and trust.

For more information: **(800) 628-3667 • (817) 834-7300**

National Door demonstrates new window solutions

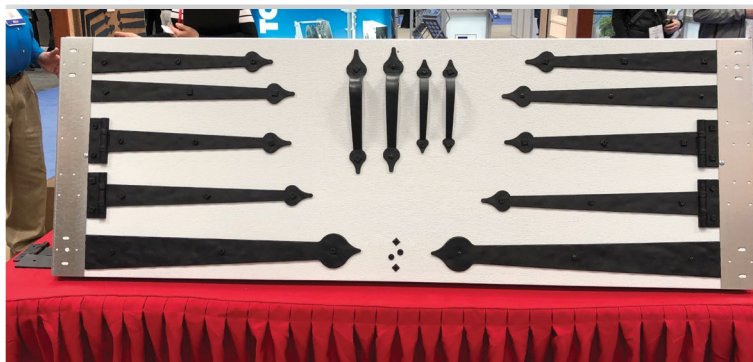

National Door showcased its new color-match frames and inserts and a variety of residential and commercial window solutions. Products included residential window frames, decorative inserts, commercial windows, and a patented impact-resistant window system for wind-load applications.

National Door's residential frames are manufactured using state-of-the-art injection molding equipment and extruded/welded frame production. Exterior residential frames are produced using high-performance ASA resins and are ideal for high-heat environments.

National Door is also the largest supplier of garage door lubricants in the industry. Custom-formulated lubricants with a private labeling option are available. www.natdoor.com

◀ **SEE THE IMPACT:**
The National Door booth featured impact-resistant windows and window frames plus a variety of hardware options.

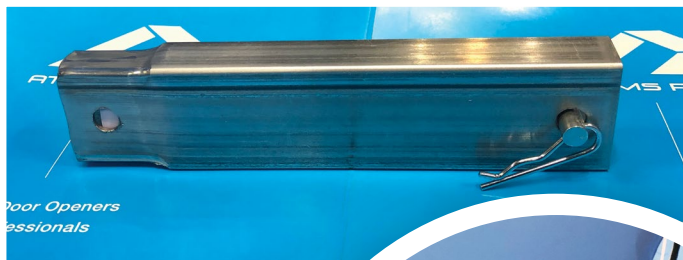

Skylink introduces new convenient products

At Expo, Skylink launched products designed for convenience and function. A sectional tube rail packaged in a handy 4' box is now available. The small box size reduces shipping costs and makes the product easier to store and transport. The new sectional tube rail is available in 7', 8', or 10' sizes.

The company also introduced a 6" extension to fit with its 7' rail. The new extension allows dealers to extend a 7' rail to 8'. This reduces the number of products dealers need to stock. Instead of ordering 7' and 8' rails, dealers can stock only 7' rails and use the new extension to adjust to a larger size.

Skylink also featured its line of Atoms Pro openers and the built-in backup battery feature. Batteries can be added to any Atoms Pro model during or after installation. This allows the customer to upgrade the unit without having to install a new opener. www.skylinkhome.com

► **BATTERY BACKUP:**
You can add a battery to any Atoms Pro model during or after installation, allowing the customer to upgrade without having to change the opener.

WE SAW IT COMING

BACKUP BATTERY COMPATIBLE SINCE DAY 1

Fully compliant with new California requirements.

We've got you covered. From the beginning all Skylink® AtomsPro™ Openers were designed to be backup battery compatible to offer safety and peace-of-mind to homeowners who want to be able to operate their garage door opener during a power outage.

America's Favorite Garage Doors[®]

Clopay impresses with new products

Clopay's booth showcased its diverse line of garage and entry doors, highlighting its products' low maintenance, wood-look designs, and new Color Blast paint color options for its doors and hardware. Several new products in both the residential and commercial segments were also on display.

The enhanced residential Avante Collection/Commercial Model 905 aluminum and glass garage door was one of the newly launched products. The new frame has a smooth, flat surface profile with squared edges. The Model 905 can now be made in sizes up to 9' without a center stile, allowing for wider expanses of glass and unobstructed views. Additional enhancements include wider stiles and rails and a 3/16" joint seal between sections.

Later this year, insulated stiles and rails used in combination with Clopay's current tempered insulated glass options will also be available.

Another featured product was the new Reserve Wood Collection Limited Edition Series with Extira. This low-maintenance insulated wood-look door features an exterior-rated wood composite and is now available as a standard face panel option. Extira is moisture-, rot-, and termite-resistant, and the door is built in three sections instead of four, allowing for a larger window section.

www.clopay.com

► **SLEEK DESIGN:** *The new version of this Avante Collection door caught the attention of attendees with its smooth surface and wider expanses of glass.*

Denco features patented Pro Back-Winder Hub

At Expo, Denco showcased its vast inventory and launched its patented Pro Back-Winder Hub. This unique tool was designed and developed by David Dawdy, who has given Denco exclusive consent to produce and market the product.

The new solid steel hub provides a simple and safe solution to situations with tricky or slipped cables and is the first of its kind on the market. It slides and tightens to either end of the torsion shaft to back-wind the springs. This feature allows the technician to unwrap and reinstall the cables on the drum.

Denco announced it will donate a portion of each Pro Back-Winder Hub sale to the IDA Scholarship Foundation.

Exclusive tools, such as the Pro-Cut Angle Cutter, the Pro-Cut Handheld Chain Break, and the Quick Roller Change Tool, were also featured in the booth. www.dencodoorstuff.com

Garaga highlights company merger and expanded product lines

For the first time, Garaga and Mid-America Door were featured together at Expo. (Garaga purchased Mid-America in August 2018.) The integrated booth focused on the advantages the

merger offers the door dealer community, such as the ability to reach a greater number of territories and the expansion of its product lines.

Expo attendees had a unique opportunity to speak with the owners directly about this exciting merger. The company stressed how the family philosophy of Garaga and the hands-on company culture and extended product

offerings of Mid-America combine to make an ideal union.

With the consumer market calling for more styles, colors, and window choices, Garaga also highlighted its new streamlined product options and various door colors. New colors added to the Acadia 138 line include black, charcoal, and chocolate walnut. www.garaga.com

Royal expands Solar Reflective color range

Royal Building Products highlighted its broad range of trim, moldings, siding, and decking products with an emphasis on its Uniflex Garage Door Thermostop product. Its patented design features better performance in shipping, adhesion, less flex distortion, and fewer SKUs

to manage.

Uniflex Garage Door Thermostop is now available in 30 colors total, including two new Royal Solar Reflective (RSR) colors introduced at the show: slate and charcoal.

The expanded RSR line is the darkest color palette of garage door stops available at Royal. These colors are formulated to maximize solar reflectivity, reduce heat buildup, and reduce distortion or buckling of standard dark-colored PVC weatherseal products.

Another product featured was the Royal SurEdge trimboard. SurEdge features sharply defined 90-degree corners that create perfect square edges and a seamless, clean finished look.

www.royalbuildingproducts.com

What's so cool about Royal Solar Reflective™ technology?

We formulated our darker garage door stop colors to reflect infrared light while taking in the same amount of visible light. Our latest innovation adds up to a serious HBU (Heat Build Up) upgrade over industry standards.

Our solar reflective colors are the perfect match for virtually any garage door style.

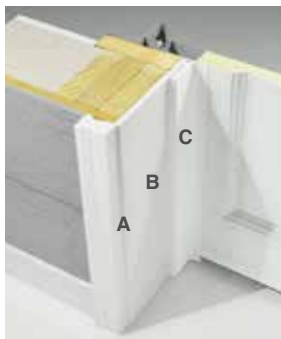

It takes more than the best weatherseal to protect a garage.

The Royal® Garage Door Trim System

From our garage door stop to our jamb to our brick mould, we have an entire low maintenance PVC system that installs faster than aluminum, performs better than wood and wears well, like PVC.

- **Uniflex™ ThermoStop® is available in 2", 2 5/8" and 3 1/4" widths.**
- **32 ThermoStop® colors available.**
- **PVC jamb and brick mould look and install like wood.**
- **Complete Royal Trim System is moisture and dent resistant.**

Haas Door unveils new booth and new options

Haas Door unveiled a new booth highlighting its custom doors, diverse color options, and versatile window designs. The SelectView program, a window placement series that allows the customer to place windows in almost any configuration, was one of the main attractions.

SelectView is available in both residential and commercial doors and offers many options to enhance garage doors. Using SelectView, dealers and customers can configure lights, determine window placement, and choose from a variety of glass and glazing. Options include specialty and

decorative glass choices and window inserts.

Haas also introduced its latest impact glazing option for the RA360 and added three design pressures for non-Florida and Florida. The RA360 impact glazing is available in clear, bronze, dark gray, and pebble. This door line has four anodized color options, 10 painted options, and 14 wood grain finishes.

▲ **ALL NEW LOOK:** Haas' new booth occupied a key location on the show floor, featuring several new designs and customized displays.

Service Spring gives back

Service Spring spotlighted its recently launched program dedicated to supporting two charitable organizations: Mercy Children's Hospital and Children's Miracle Network Hospital.

The company announced it will donate \$1 to these hospitals for every Elite or Premium Series LiftMaster operator sold by Service Spring in 2019. Donations will support autism services, hippotherapy (therapy with horses), and premature babies in the NICU in the Northwest Ohio area.

"Children's Miracle Network is an organization close to our hearts. We value family at Service Spring. Many of us are fortunate to be able to go home and hug our children, grandchildren, nieces, and nephews. We're the lucky ones," said Kaley Wichman, director of marketing.

The promotion will run Jan. 1-Dec. 31, 2019, or until the maximum donation of \$25,000 is reached. "We hope that money we are able to donate will ease the burden of some of the medically fragile and special needs kiddos in our community," Wichman added.

Additional information and full advertising disclosure can be viewed at:

EXPO 2019

ENTREMAT/AMARR

Entrematic presents plenty of options

Entrematic highlighted five new thickness options to its line of commercial polyurethane doors. The extended size range includes 1", 1-3/8", 1-5/8", 2", and 3". The additional thicknesses were designed to meet the demand for varying levels of energy efficiency in today's marketplace.

The new Amarr Quiet Door option was also featured. With Quiet Door, door operation noise can be reduced by up to 38% (varies by model).

Amarr Color Zone now offers more than 600 Sherwin-Williams paint colors for Amarr residential or commercial steel doors. Doors are factory-painted with Sherwin-Williams SnapDry paint that is resistant to dirt, fingerprints, and UV weathering. www.entrematic.us

► **PICK A COLOR:** Over 600 paint color options are now available for Amarr residential or commercial steel doors.

PLAYS WELL WITH OTHERS.

Amarr 2747 polyurethane insulated replacement sections are ideal for repairing damaged 1-5/8" polyurethane doors. The wide groove exterior panel and shiplap joint profile make Amarr 2747 both functionally and aesthetically compatible with other manufacturers' product.

Visit amarr.com or call 1.800.503.3667 for more information and to locate the nearest Entrematic Door Center.

▲ **MOVING FORWARD:** ATL's new booth design effectively showcased its new branding.

Genie features interactive booth and multiple new products

Genie's large booth at Expo displayed many recently launched and soon-to-come products. The company demonstrated both residential and commercial lines and interactive displays while providing educational presentations to attendees throughout the show.

Genie introduced its line of 140V residential openers, in screw drive, belt, and chain drive models, all featuring its integrated Aladdin Connect smart device system. These openers can be used on sectional doors up to 14' high.

Later in 2019, Aladdin Connect will be compatible with smart platforms including Google Assistant, Amazon Alexa, and IFTTT. Also coming soon will be a new residential wall-mount opener and a countdown-to-close timer used while closing a commercial door with a Genie commercial operator. The timer will give notice to onlookers that the door is about to close.

Also shown in the booth and scheduled to launch later in 2019 is the universal remote-control brilliant LED integrated lighting designed for Genie's openers and heavy-duty residential rails. www.geniecompany.com

Miller Edge introduces MyEdge customer portal and two new products

At Expo, Miller Edge promoted its online customer portal, MyEdge, which is scheduled to launch in the second quarter. MyEdge can be accessed through the company's website and gives customers 24/7 access. With this valuable new resource, dealers can place and track orders, pay invoices, and access a variety of marketing support tools any time from anywhere. The portal eliminates the need to call in every order and reduces lead times for quote approvals. Reorders are also simplified with the convenient Order History feature.

Miller Edge also introduced the MG110 sensing edge kit and the ME120-C5 mounting channel. The MG110 is designed to protect draw-in posts, pockets, and pivot points in gate installations. The ME120-C5, paired with the ME120 sensing edge, creates a sweep edge at the bottom of a swing gate, safeguarding the entrapment zone on driveways and curbs along the path of travel. www.milleredge.com

► **NEW PORTAL:**
The Miller Edge customer portal, MyEdge, gives dealers 24/7 access.

YEAH. IT'S THAT BRIGHT.
